

Foreword	5
Executive Summary	11
Chapter 1 – Introduction	15
Background	15
Objectives and scope	15
Evolution of decision making in the electricity sector	16
Past studies in the series	17
Other relevant international and national studies	18
Overview of the report	20
Chapter 2 – Input data and cost calculation framework	23
Overview of the questionnaire	23
Coverage of responses	24
Methodology and common assumptions	25
Chapter 3 – Generation costs of coal-fired, gas-fired and nuclear power plants	35
Coal-fired power plants	35
Gas-fired power plants	39
Nuclear power plants	43
Cost ranges for coal, gas and nuclear power plants	46
Cost ratios for coal, gas and nuclear power plants	46
Chapter 4 – Generation costs of wind, hydro and solar power plants	53
Wind power plants	53
Hydro power plants	56
Solar power plants	58
Chapter 5 – Generation costs of combined heat and power (CHP) plants	63
Background	63
Characteristics of the CHP plants considered in the study	63
Cost estimation approach	63
Electricity generation cost estimates	65
Chapter 6 – Other generation technologies	69
Distributed generation	69
Waste incineration and landfill gas	71
Combustible renewable	71
Geothermal	72
Oil	72
Chapter 7 – Findings and conclusions	73
Background	73
Scope of the study and limitations in the methodology used	73
Technology trends	75
Coal, gas and nuclear electricity generation	75
Renewable sources, CHP and other technologies	76
Generation cost trends	77
Concluding remarks	78

Appendices 79

Appendix 1 –	List of members of the Expert Group and contributors to the publication	79
Appendix 2 –	Factors covered in reported costs	81
Appendix 3 –	Country statements on cost estimates and generation technology	93
Appendix 4 –	Generation technology	155
Appendix 5 –	Cost estimation methodology	173
Appendix 6 –	Methodologies incorporating risk into generating cost estimates	177
Appendix 7 –	Allocating the costs and emissions of CHP plants to the produced electricity and heat	193
Appendix 8 –	Fuel price trends and projections	203
Appendix 9 –	Economic impacts of wind power integration into electricity grids	207
Appendix 10 –	Impact of carbon emission trading on generation costs	219
Appendix 11 –	List of main abbreviations and acronyms	229
