Executive Summary	41
Introduction	53

Part A: Global Energy Prospects: Impact of Developments in India and China **71**

1	Global Energy Trends	73
	Highlights	73
	Reference Scenario	74
	<i>Global Energy Prospects</i>	74
	<i>Energy Investment</i>	94
	Alternative Policy Scenario	96
	<i>Global Energy Prospects</i>	96
	<i>Energy Investment</i>	105
	High Growth Scenario	108
	<i>Global Energy Prospects</i>	108
	<i>Energy Investment</i>	114
2	Energy Trends in China and India	117
	Highlights	117
	Reference Scenario	118
	<i>Energy Demand</i>	118
	<i>Energy Supply</i>	123
	<i>Investment Needs</i>	129
	Alternative Policy Scenario	130
	High Growth Scenario	133
3	International Trade and the World Economy	135
	Highlights	135
	China and India in the Global Economy	136

Explaining China's and India's Economic Growth	136
International Trade and Financial Flows	140
Global Economic and Energy Market Linkages	145
Simulating the Impact of Faster Growth in China and India	149
<i>Energy and Other Commodity Prices and Expenditures</i>	151
<i>International Trade</i>	152
<i>Economic Growth and Structure in the Rest of the World</i>	155

4

The World's Energy Security 159

Highlights	159
Energy Security in a Global Market	160
<i>Defining Energy Security</i>	160
<i>How Supply Disruptions Affect Consuming Countries</i>	163
<i>Measuring Energy Security</i>	164
The Role of China and India in International Energy Trade	165
<i>Oil</i>	165
<i>Natural Gas</i>	171
<i>Coal</i>	174
The Energy Security Policies of China and India	175
Implications for Consuming Countries	181
<i>Impact of Rising Energy Demand</i>	181
<i>Impact of China's and India's Energy Security Policies</i>	187

5

Global Environmental Repercussions 191

Highlights	191
Energy-Related CO ₂ Emissions	192
<i>Global Trends</i>	192
<i>Contribution of China and India to Global Emissions</i>	196
<i>Implications for Climate Change</i>	204
<i>The 450 Stabilisation Case</i>	207
Focus on Prospects for Clean Coal Technology for Power Generation	216
<i>CO₂ Capture and Storage</i>	216
<i>Power-Generation Technologies</i>	220

6

Energy Policy Ramifications 225

Highlights	225
Addressing Energy Security and Climate Challenges	226
Policy Co-operation with China and India	230
Technology Co-operation and Collaboration	235
Role of the Clean Development Mechanism	238

7	Political, Economic and Demographic Context	243
	Highlights	243
	The Political Context	244
	The Economic Context	245
	<i>Economic Structure and Growth</i>	245
	<i>Main Drivers of Growth</i>	248
	<i>Economic Challenges and Prospects</i>	251
	Demographic Trends and Prospects	255
	<i>Urbanisation</i>	257
	<i>Ageing</i>	258
8	Overview of the Energy Sector	261
	Highlights	261
	China's Energy Sector	262
	Energy Administration and Policy	268
	Energy Policy Challenges and Uncertainties	271
	<i>Security of Energy Supply</i>	272
	<i>Environmental Issues</i>	273
	<i>Energy Efficiency</i>	275
	<i>Market Reforms</i>	278
	<i>Access to Modern Energy</i>	281
9	Reference Scenario Demand Projections	283
	Highlights	283
	Key Assumptions	284
	Primary Energy Demand	286
	Final Energy Consumption	289
	<i>Industry</i>	291
	<i>Transport</i>	296
	<i>Residential</i>	304
	<i>Other Sectors</i>	309
	Environmental Implications	310
	<i>Local Air Pollution</i>	310
	<i>Energy-Related CO₂ Emissions</i>	313
10	Reference Scenario Supply Projections	317
	Highlights	317
	Oil Supply	318

<i>Oil Resources and Reserves</i>	318
<i>Oil Production</i>	320
<i>Oil Refining</i>	323
<i>Oil Trade</i>	325
<i>China's Oil Security Policies</i>	326
Natural Gas Supply	328
<i>Gas Resources and Reserves</i>	328
<i>Gas Production</i>	330
<i>Gas Imports</i>	332
Coal Supply	334
<i>Coal Resources and Reserves</i>	334
<i>Coal Production</i>	336
<i>Coal Transport</i>	339
<i>Coal Pricing</i>	340
<i>Coal Trade</i>	342
Electricity Supply	343
<i>Overview of the Power Sector</i>	343
<i>Outlook</i>	344
<i>Capacity Requirements</i>	349
<i>Electricity Pricing</i>	350
<i>Power Generation Economics</i>	352
Renewables	354
<i>Policy Framework</i>	356
Investment	358

11

Alternative Policy Scenario Projections 361

Highlights	361
Background and Assumptions	362
Key Results	363
<i>Energy Demand</i>	363
<i>Implications for Energy Markets and Supply Security</i>	366
<i>Environmental Implications</i>	368
Results by Sector	372
<i>Power Generation</i>	372
<i>Industry</i>	374
<i>Transport</i>	378
<i>Residential</i>	380
Cost-Effectiveness of Policies	384

12

High Growth Scenario Projections 389

Highlights	389
------------	-----

	Background and Assumptions	390
	Energy Demand	391
	Implications for Energy Markets and Supply Security	395
	Implications for Investment	399
	Environmental Implications	400
	<i>Local Air Pollution</i>	400
	<i>Energy-Related CO₂ Emissions</i>	401
	Focus on the Coastal Region	403
	Highlights	403
13	Background and Assumptions	404
	Energy Outlook	407
	<i>Primary Energy Demand</i>	407

List of Figures

Introduction

1. Share of China and India in Incremental Energy Demand, Imports and Energy-Related CO₂ Emissions, 2000-2006 54
2. Assumed Ratio of Natural Gas and Implied Relation of Coal Prices to Oil Prices in the Reference Scenario 65

Part A: Global Energy Prospects: Impact of Developments in China and India

Chapter 1. Global Energy Trends

- 1.1 World Primary Energy Demand in the Reference Scenario 76
- 1.2 Increase in World Primary Energy Demand by Fuel in the Reference Scenario 77
- 1.3 Primary Energy Demand by Region in the Reference Scenario 78
- 1.4 Regional Shares in Incremental Primary Energy Demand by Fuel in the Reference Scenario, 2005-2030 78
- 1.5 Primary Energy Intensity in the Reference Scenario 79
- 1.6 Share of Transport in Primary Oil Demand by Region in the Reference Scenario 81
- 1.7 Net Oil Trade in the Reference Scenario 83
- 1.8 Incremental Primary Natural Gas Demand by Region in the Reference Scenario, 2005-2030 86
- 1.9 Net Imports of Natural Gas by Major Region in the Reference Scenario 88
- 1.10 World Coal Production by Type in the Reference Scenario 91
- 1.11 FOB Cash Costs and Prices of World Steam Coal from Major Exporters, 2005 91
- 1.12 Fuel Mix in Power Generation in the Reference Scenario 94
- 1.13 Cumulative Investment in Energy Infrastructure in the Reference Scenario by Fuel and Region, 2006-2030 96
- 1.14 Incremental World Primary Fossil-Energy Demand in the Alternative Policy Scenario, 2005-2030 99
- 1.15 Change in Primary Energy Intensity in the Reference and Alternative Policy Scenarios, 2005-2030 99
- 1.16 Oil Demand and Savings by Sector in the Alternative Policy Scenario 100
- 1.17 Increase in Net Oil Imports in the Reference and Alternative Policy Scenarios, 2006-2030 102
- 1.18 Coal Demand in the Reference and Alternative Policy Scenarios 104
- 1.19 Incremental Non-Fossil Energy Demand in the Reference and Alternative Policy Scenarios 105

1.20	Fuel Mix in World Power Generation in the Reference and Alternative Policy Scenarios	107
1.21	Change in World Primary Oil Demand by Region in 2030 in the High Growth Scenario Relative to the Reference Scenario	110
1.22	Incremental Oil Production by Region in 2030 in the High Growth Scenario Relative to the Reference Scenario	111
1.23	Change in Gas Imports in the High Growth Scenario Relative to the Reference Scenario	112
1.24	Change in Power Generation by Fuel in the High Growth Scenario Relative to the Reference Scenario	114

Chapter 2. Energy Trends in China and India

2.1	Shares of China and India in the Increase in World Primary Energy Demand by Fuel in the Reference Scenario, 2005-2030	118
2.2	Primary Oil Demand in China and India by Sector in the Reference Scenario	121
2.3	Fuel Mix in Power Generation in China and India in the Reference Scenario	122
2.4	Road Transport Fuel Consumption in China and India in the Reference Scenario	122
2.5	Net Oil Imports in China and India in the Reference Scenario	125
2.6	Coal Balance in China and India in the Reference Scenario	127
2.7	Cumulative Investment in Energy Supply in China and India by Fuel in the Reference Scenario, 2006-2030	129
2.8	Incremental Primary Fossil Fuel Demand in China and India in the Alternative Policy Scenario, 2005-2030	131
2.9	Primary Energy Demand in China and India in the Reference and High Growth Scenarios	134

Chapter 3. International Trade and the World Economy

3.1	Real Output in China, India, Other Asian and Newly Industrialised Economies	138
3.2	Share of Exports in GDP in Selected Countries, 2006	140
3.3	China's and India's Share in World Trade in Goods and Services Compared with Other Countries	141
3.4	Share of China, India and the United States in World Primary Commodity Consumption in 2005	142
3.5	Foreign and Overseas Direct Investment, 2005	145
3.6	International Prices of Major Commodities	147
3.7	Potential Economic Impact from High GDP Growth in China and India	149
3.8	Value of Worldwide Trade in Goods and Services	153

3.9	Share of Energy in World International Trade Value	154
3.10	Change in the Value of Imports in 2030 in the High Growth Scenario Compared with the Reference Scenario	154
3.11	Gross Domestic Product by Region	157
3.12	Regional Shares of World GDP at Market Exchange Rates	157

Chapter 4. The World's Energy Security

4.1	Share of China and India in World Oil Demand	166
4.2	Net Oil Imports by Region and Scenario	167
4.3	Share of China and India in Total Inter-Regional Oil Trade	168
4.4	Oil Export Flows from the Middle East	170
4.5	Share of Natural Gas in Total Primary Energy Demand in China and India	171
4.6	Share of China and India in Total Inter-Regional Natural Gas Trade	172
4.7	Share of China and India in Natural Gas Exports by Source	173
4.8	Share of OPEC in World Oil Production	182
4.9	Average IEA Crude Oil Import Price in the Reference and High Growth Scenarios	184
4.10	Major World Oil Supply Disruptions	186
4.11	Cumulative Cost of Maintaining Oil Stocks to Ensure 45 Days of Net Imports in China and India, 2006-2030	189

Chapter 5. Global Environmental Repercussions

5.1	Energy-Related CO ₂ Emissions by Scenario	192
5.2	Incremental Energy-Related CO ₂ Emissions by Scenario, 2005-2030	193
5.3	Energy-Related CO ₂ Emissions by Fuel and Scenario	193
5.4	Average Annual Growth in World Energy-Related CO ₂ Emissions and Primary Energy Demand by Scenario	194
5.5	Share of Power Generation in World Energy-Related CO ₂ Emissions and in Primary Energy Demand, 1980-2030	194
5.6	Carbon Dioxide Intensity of Electricity Generation by Scenario	196
5.7	Incremental Energy-Related CO ₂ Emissions by Region and Scenario, 2005-2030	198
5.8	Energy-Related CO ₂ Emissions by Region, 1900-2005	201
5.9	Cumulative Energy-Related CO ₂ Emissions in Selected Countries/Regions in the Reference Scenario	201
5.10	Per-Capita Energy-Related CO ₂ Emissions and Population by Region in the Reference Scenario	203
5.11	Change in Carbon Intensity by Region and Scenario, 2005-2030	204
5.12	CO ₂ Emissions in the 450 Stabilisation Case	209
5.13	Electricity Generation by Type in the 450 Stabilisation Case	212

5.14	Fossil-Energy Generating Capacity in 2030 in the 450 Stabilisation Case Compared with the Reference and Alternative Policy Scenarios	212
5.15	Share of Cumulative Power-Generation Investment by Technology, 2006-2030	214
5.16	CO ₂ Capture, Transport and Storage Infrastructure	217
5.17	Thermal Efficiency of Coal-Fired Power Generation	221
5.18	OECD Coal-Fired Power Plant Investment Costs	223

Chapter 6. Energy Policy Ramifications

6.1	Public Energy Research and Development Funding in IEA Countries	236
-----	---	-----

Part B: China's Energy Prospects

Chapter 7. Political, Economic and Demographic Context

7.1	Sectoral Share of GDP, 2004	245
7.2	Foreign Exchange Reserve Holdings at mid-2007	247
7.3	Source of Chinese Growth	249
7.4	Share of Chinese Investment in GDP by Source	250
7.5	Number of Poor	254
7.6	Distribution of Population and Major Cities in China	256
7.7	Ageing	259

Chapter 8. Overview of the Energy Sector

8.1	Total Primary Energy Demand in China, 2005	262
8.2	Per-Capita Primary Energy Demand in China, India and Other Selected Countries, 2005	266
8.3	China's Energy Production and Consumption by Province, 2005	267
8.4	Organisation of Energy Policy Making and Administration in China	269
8.5	Number of "Top 1 000" Enterprises by Province	277
8.6	Energy Subsidies in China	279

Chapter 9. Reference Scenario Demand Projections

9.1	China's Primary Energy Demand in the Reference Scenario	289
9.2	Total Final Consumption by Sector	290
9.3	China's Industrial Energy Demand by Fuel	293
9.4	Global Ammonia Production by Feedstock, 2005	296
9.5	China's Transport Energy Demand by Mode in the Reference Scenario	297
9.6	New Car Sales in China	300

9.7	International Comparison of Fleet Average Fuel Economy Standards as of July 2007	303
9.8	Residential Energy Consumption by Fuel, 2005 and 2030	305
9.9	Residential Floor Area per Capita and Household Size in China	307
9.10	Major Appliance Ownership in China, 1985-2030	308
9.11	SO ₂ Emissions by Sector in the Reference Scenario	311
9.12	China CDM CO ₂ Reduction by Project Type	316
9.13	Energy-Related CO ₂ Emissions by Fuel in the Reference Scenario	316

Chapter 10 . Reference Scenario Supply Projections

10.1	China's Oil and Gas Resources and Supply Infrastructure	319
10.2	Oil Discoveries in China	319
10.3	Planned Refining Capacities in China	323
10.4	China's Refining Distillation Capacity in the Reference Scenario	324
10.5	China's Crude Oil Imports by Origin in 2006	325
10.6	China's Oil Balance in the Reference Scenario	326
10.7	Natural Gas Discoveries in China since 1997	330
10.8	China's Gas Balance in the Reference Scenario	332
10.9	China's Natural Gas Imports in the Reference Scenario	334
10.10	China's Coal Resources	335
10.11	China's Coal Supply	336
10.12	Coal Prices in China Compared with International Markets	341
10.13	China's Hard Coal Trade	343
10.14	Electricity Generation in China, 2005-2030	345
10.15	China's Generating Capacity Additions in the Reference Scenario, 2006-2030	349
10.16	End-Use Prices by Region and Province, 2006	352
10.17	Plant Generating Costs in China	353
10.18	China's Energy Investments in the Reference Scenario, 2006-2030	358

Chapter 11. Alternative Policy Scenario Projections

11.1	China's Primary Energy Demand in the Alternative Policy Scenario and Savings Relative to the Reference Scenario	365
11.2	Savings in China's Primary Coal Demand in the Alternative Policy Scenario Relative to the Reference Scenario, 2030	365
11.3	China's Net Energy Imports in the Reference and Alternative Policy Scenarios, 2030	368
11.4	China's Local Pollution Trends in the Reference and Alternative Policy Scenarios	369
11.5	China's CO ₂ Emissions in the Alternative Policy Scenario Compared with the Reference Scenario	370

11.6	Changes in China's Electricity Generation in the Alternative Policy Scenario and Savings Relative to the Reference Scenario, 2030	373
11.7	Industrial Energy Savings in China by Fuel and Industrial Sub-Sector in 2030 in the Alternative Policy Scenario Relative to the Reference Scenario	377
11.8	Savings in China's Transport Oil Demand in the Alternative Policy Scenario Relative to the Reference Scenario	381
11.9	China's Air Conditioner and Refrigerator Electricity Savings in the Alternative Policy Scenario	384
11.10	Payback Period of Selected Measures in China in the Alternative Policy Scenario	385
11.11	Cumulative Import Bill in the Reference and Alternative Policy Scenarios, 2007-2030	388
11.12	Change in Energy Investment in the Alternative Policy Scenario Compared with the Reference Scenario, 2006-2030	388

Chapter 12. High Growth Scenario Projections

12.1	Incremental Primary Energy Demand by Fuel in China in the Reference and High Growth Scenarios, 2005-2030	392
12.2	Incremental Final Energy Demand by Sector in China in the Reference and High Growth Scenarios, 2005-2030	393
12.3	Vehicle Stock in the Reference and High Growth Scenarios, Compared with Selected Countries	394
12.4	China's Net Coal Imports in the Reference and High Growth Scenarios	395
12.5	China's Oil Demand, Production and Net Imports in the Reference and High Growth Scenarios	397
12.6	China's Cumulative Oil and Gas Import Bill in the Reference and High Growth Scenarios, 2006-2030	398
12.7	Cumulative Energy Supply Investment in China in the Reference and High Growth Scenarios, 2006-2030	399
12.8	China's CO ₂ Emissions in the Reference and High Growth Scenarios	401

Chapter 13. Focus on the Coastal Region

13.1	Provinces and Regions of China	405
13.2	Share of the Coastal Region in China's Economy and Energy Demand, 2005	408
13.3	Provincial Energy Intensity Targets, 2005-2010	410
13.4	Energy Intensity Reduction Target and Outcome by Province in China's Coastal Region, 2005-2006	411

13.5	Contribution of the Coastal Region to China's Incremental Final Energy Demand by Fuel in the Reference Scenario, 2005-2030	412
13.6	Power Generating Capacity in the Coastal Region	413
13.7	Car Ownership and GDP per Capita in Selected Provinces in China, 1994-2005	415
13.8	Share of the Population in China's Coastal Provinces with Access to Natural Gas and Planned LNG	416
13.9	Power Generation Costs by Fuel and Distance, 2005	417
13.10	CO ₂ Emissions per Capita, 2005-2030	419

Part C: India's Energy Prospects

Chapter 14. Political, Economic and Demographic Context

14.1	GDP per Capita by State	429
14.2	Economic Structure and Employment	430
14.3	Labour Productivity in Selected Countries Relative to the United States	431
14.4	Sources of Output Growth in India	432
14.5	Share of Fuel in Value of India's Imports and Exports	435
14.6	Share of Gross Capital Formation in GDP in China, India and Japan	439
14.7	Percentage of Population Urbanised in India Compared to 2005 Urbanisation Level in Selected Countries	441

Chapter 15. Overview of the Energy Sector

15.1	India's Fossil Fuel Production and Imports, 2005	446
15.2	Energy Policy Administration in India's Energy Sector	451

Chapter 16. Reference Scenario Demand Projections

16.1	Primary Energy Demand in Selected Countries in the Reference Scenario	466
16.2	Sectoral Shares in Final Energy Demand in India in the Reference Scenario	467
16.3	Industrial Energy Demand by Fuel in India in the Reference Scenario	468
16.4	India's Transport Energy Demand by Mode in the Reference Scenario	473
16.5	India's Vehicle Stock in the Reference Scenario	474
16.6	Residential Fuel Mix in India in the Reference Scenario	477
16.7	Fuelwood and LPG Use for Cooking in India by Income Class, 2005	480

16.8	Fuel Shares in Household Energy Consumption for Cooking in India by Area in the Reference Scenario	481
16.9	Appliance Ownership in India Compared with the OECD, 2004	482
16.10	Prevalence of Personal Computers	483
16.11	Per-Capita Energy-Related CO ₂ Emissions in India, Compared with Developing Countries and the OECD in the Reference Scenario	486
16.12	Increase in India's CO ₂ Emissions by Sector in the Reference Scenario	487

Chapter 17. Reference Scenario Supply Projections

17.1	Oil Discoveries in India since 1997	491
17.2	Distillation Capacity in India	494
17.3	Crude Oil Imports by Origin, Fiscal Year 2004/05	495
17.4	India's Oil Balance in the Reference Scenario	496
17.5	Main Oil and Gas Infrastructure in India	498
17.6	Natural Gas Discoveries in India since 1997	499
17.7	India's Natural Gas Balance in the Reference Scenario	502
17.8	Major Coal Fields and Mining Centres in India	505
17.9	Coal-Mining Productivity in Australia, China, India and the United States	508
17.10	India's Coal Production and Imports in the Reference Scenario, 1990–2030	510
17.11	Changes in India's Electricity Generation Mix in the Reference Scenario	511
17.12	India's Capacity Additions by Fuel	517
17.13	Electricity Generating Costs in India	518
17.14	India's Investment in Energy Infrastructure, 2006-2030	520
17.15	India's Power Generation Capacity Increases	523
17.16	Comparison of Returns on Investment, India and OECD	524
17.17	Electricity Losses by State	526
17.18	Private Investment in India's Electricity Sector, 1991-2005	527

Chapter 18. Alternative Policy Scenario Projections

18.1	India's Energy Demand in the Reference and Alternative Policy Scenarios	534
18.2	India's Fossil Fuel Imports in the Reference and Alternative Policy Scenarios in 2030	536
18.3	Local Air Pollutant Emissions in India in the Reference and Alternative Policy Scenarios	537

18.4	India's CO ₂ Emissions in the Alternative Policy Scenario Compared with the Reference Scenario	538
18.5	CO ₂ Intensity of India's Electricity Generation in the Reference and Alternative Policy Scenarios	538
18.6	India's Power Generation Fuel Mix in the Reference and the Alternative Policy Scenarios	541
18.7	Average Coal-Fired Power Plant Efficiency in India Compared with the OECD in the Alternative Policy Scenario	543
18.8	India's Energy Savings in Industry and Shares of Savings by Sub-Sector in 2030 in the Alternative Policy Scenario	547
18.9	Road Transport Energy Use in India in the Reference and Alternative Policy Scenarios	550
18.10	Reduction in Final Energy Consumption in the Residential and Services Sectors in the Alternative Policy Scenario by Fuel, 2005-2030	554
18.11	Change in Investment in the Alternative Policy Scenario, 2006-2030	555
18.12	Annual Energy-Related Expenditure per Household	555
18.13	Payback Periods for Various Household Appliances and Lighting	556
18.14	Payback Period for Electrical Pumps in Agriculture	556

Chapter 19. High Growth Scenario Projections

19.1	India's Energy Demand in the Reference and High Growth Scenarios	562
19.2	India's Final Energy Demand by Sector in the Reference and High Growth Scenarios	563
19.3	India's Vehicle Ownership and Stock in the Reference and High Growth Scenarios Compared with Selected Countries	564
19.4	India's Coal Supply in the Reference and High Growth Scenarios	565
19.5	Oil and Gas Net Imports in the Reference and High Growth Scenarios	567
19.6	Cumulative Investment in India's Energy-Supply Infrastructure in the Reference and High Growth Scenarios, 2006-2030	569
19.7	Energy-Related CO ₂ Emissions per Capita in the Reference and High Growth Scenarios Compared with Selected Countries	570
19.8	Change in India's Residential Energy Demand in the High Growth Scenario Relative to the Reference Scenario in 2030	571

Chapter 20. Focus on Energy Poverty

20.1	Electricity Access and Reliance on Biomass in India	577
20.2	Annual Average Premature Deaths from Indoor Air Pollution	582

List of Tables

Introduction

1. World Population Growth	60
2. World Real GDP Growth in the Reference Scenario	62
3. Fossil-Fuel Price Assumptions in the Reference Scenario	64

Part A: Global Energy Prospects: Impact of Developments in India and China

Chapter 1. Global Energy Trends

1.1	World Primary Energy Demand in the Reference Scenario	74
1.2	World Primary Oil Demand in the Reference Scenario	80
1.3	World Oil Production in the Reference Scenario	82
1.4	World Primary Natural Gas Demand in the Reference Scenario	85
1.5	World Primary Natural Gas Production in the Reference Scenario	87
1.6	World Primary Coal Demand in the Reference Scenario	89
1.7	World Coal Production in the Reference Scenario	90
1.8	World Electricity Demand in the Reference Scenario	93
1.9	Cumulative Investment in Energy-Supply Infrastructure in the Reference Scenario, 2006-2030	95
1.10	World Primary Energy Demand in the Alternative Policy Scenario	97
1.11	Oil Production in the Alternative Policy Scenario	101
1.12	World Primary Natural Gas Demand in the Alternative Policy Scenario	102
1.13	Change in Cumulative Investment in Energy-Supply Infrastructure in the Alternative Policy Scenario, 2006-2030	107
1.14	World Primary Energy Demand by Region in the High Growth Scenario	109
1.15	World Primary Energy Demand by Fuel in the High Growth Scenario	109
1.16	Net Oil Imports by Major Importing Region in the High Growth Scenario	111
1.17	Net Inter-Regional Hard Coal Trade in Selected Regions in the High Growth Scenario	113
1.18	Change in Cumulative Investment in Energy-Supply Infrastructure in the High Growth Scenario, 2006-2030	114

Chapter 2. Energy Trends in China and India

2.1	Primary Energy Demand in China and India in the Reference Scenario	119
-----	--	-----

2.2	Sectoral Shares in Final Energy Consumption in China and India in the Reference Scenario	123
2.3	Oil Production in China and India in the Reference Scenario	125
2.4	Primary Energy Demand in China and India in the Alternative Policy Scenario	132

Chapter 3. International Trade and the World Economy

3.1	Share of China, India and the United States in World Trade in Goods and Services	141
3.2	Fossil-Fuel Prices in the High Growth Scenario	152
3.3	World Real GDP Growth in the High Growth Scenario	156

Chapter 4. The World's Energy Security

4.1	Increase in World Primary Oil Demand by Region and Scenario, 2006-2030	166
4.2	Oil Net Imports in China and India	168
4.3	Net Natural Gas Imports in China and India	172
4.4	Natural Gas Imports into China and India by Source	173
4.5	Net Hard Coal Trade in China and India	174
4.6	Main Policy Responses in China and India to Rising Energy Insecurity	176
4.7	Volume of Oil Stocks to Ensure 45 Days of Net Imports in China and India	189

Chapter 5. Global Environmental Repercussions

5.1	Energy-Related CO ₂ Emissions by Region and Scenario	199
5.2	Top Five Countries for Energy-Related CO ₂ Emissions in the Reference Scenario	200
5.3	Per-Capita Energy-Related CO ₂ Emissions by Region and Scenario	202
5.4	CO ₂ Concentrations and Emissions	206
5.5	World Energy Demand in the 450 Stabilisation Case	209
5.6	Renewables-Based Electricity Generation	213
5.7	Share of Coal in CO ₂ Emissions in the Reference Scenario	216

Chapter 6. Energy Policy Ramifications

6.1	Status of CDM Projects in China and India, August 2007	240
-----	--	-----

Part B: China's Energy Prospects

Chapter 7. Political, Economic and Demographic Context

7.1	China's Importance in the World Economy	246
7.2	Populations of the Top 20 Urban Agglomerations in 2005	257

Chapter 8. Overview of the Energy Sector		
8.1	Key Energy Indicators for China	263
8.2	Selected Targets for Improvements in Energy Efficiency in the 11 th Five-Year Plan for Energy	276
Chapter 9. Reference Scenario Demand Projections		
9.1	Key Assumptions for China's Energy Projections in the Reference Scenario	285
9.2	Energy Intensity in Selected Power-Generation Technologies and End-Use Sectors in the Reference Scenario	286
9.3	China's Primary Energy Demand in the Reference Scenario	287
9.4	Industrial Energy Demand in the Reference Scenario	292
9.5	Transport Energy Demand in the Reference Scenario	297
9.6	Evolution of Key Indicators for Transport in China	299
9.7	Vehicle Ownership by Province in China, 2005	302
9.8	Emissions of Major Pollutants in the Reference Scenario	313
9.9	China's Energy-Related CO ₂ Emission Indicators in the Reference Scenario	313
9.10	Energy-Related CO ₂ Emissions by Sector in the Reference Scenario	314
Chapter 10. Reference Scenario Supply Projections		
10.1	China's Oil Reserves as of End-2005	318
10.2	China's Oil Production in the Reference Scenario	321
10.3	Chinese Oil Companies' Foreign Equity Oil Production, 2004	328
10.4	China's Natural Gas Reserves as of End-2005	329
10.5	China's Natural Gas Production in the Reference Scenario	331
10.6	LNG Regasification Terminals in China	333
10.7	China's Coal Production by Type and Region	337
10.8	Coal-Based Power-Generation Technology in China	345
Chapter 11. Alternative Policy Scenario Projections		
11.1	China's Primary Energy Demand in the Alternative Policy Scenario	364
11.2	Key Policy Assumptions in China's Power Sector in the Alternative Policy Scenario	372
11.3	China's Renewable Electricity Capacity Targets	374
11.4	Key Policy Assumptions in China's Industrial Sector in the Alternative Policy Scenario	375
11.5	China's Industrial Energy Consumption and Related CO ₂ Emissions in the Alternative Policy Scenario	377

11.6	Key Policy Assumptions in China's Transport Sector in the Alternative Policy Scenario	379
11.7	China's Transport Energy Consumption and Related CO ₂ Emissions in the Alternative Policy Scenario	380
11.8	Policy Assumptions in China's Residential Sector in the Alternative Policy Scenario	382
Chapter 12. High Growth Scenario Projections		
12.1	China's Energy Demand in the High Growth Scenario	392
12.2	Incremental Oil Production from the Deployment of Enhanced Oil Recovery in the High Growth Scenario	397
Chapter 13. Focus on the Coastal Region		
13.1	Economic Indicators by Province in China, 2005	406
13.2	Key Macroeconomic and Population Assumptions for China's Coastal Region	407
13.3	Primary Energy Demand in China's Coastal Region in the Reference Scenario	409
13.4	Electricity Generation Fuel Mix in China's Coastal Region	413
Part C: India's Energy Prospects		
Chapter 14. Political, Economic and Demographic Context		
14.1	Demographic Indicators	440
Chapter 15. Overview of the Energy Sector		
15.1	Key Energy Indicators for India	444
15.2	Private Participation in India's Energy Sector, 2005	454
15.3	India's Integrated Energy Policy: Priority Recommendations of the Expert Committee	456
Chapter 16. Reference Scenario Demand Projections		
16.1	GDP and Population Growth Rates in India in the Reference Scenario	464
16.2	Indian Primary Energy Demand in the Reference Scenario	465
16.3	Four-Wheel Vehicle Emission Standards in India	476
16.4	Urban and Rural Household Energy Consumption in India in the Reference Scenario	479
16.5	Local Air Pollutant Emissions in India in the Reference Scenario	485
Chapter 17. Reference Scenario Supply Projections		
17.1	India's Oil Reserves, End-2005	490
17.2	India's Crude Oil Production, 2006	492

17.3	India's Oil Production in the Reference Scenario	492
17.4	Natural Gas Reserves in India, End-2005	499
17.5	India's Gas Production by Field in the Reference Scenario	500
17.6	Existing and Planned LNG Regasification Terminals in India	502
17.7	Coal Resources and Reserves in India	503
17.8	Coal Production in India by Company, 2005/06	506
17.9	Performance Ratings of the State Power Sector, Selected States	525

Chapter 18. Alternative Policy Scenario Projections

18.1	India's Primary Energy Demand in the Alternative Policy Scenario	533
18.2	Key Policies in India's Power-Generation Sector in the Alternative Policy Scenario	540
18.3	Key Policies in India's Industry Sector in the Alternative Policy Scenario	546
18.4	India's Industrial Energy Consumption and Savings in the Alternative Policy Scenario	546
18.5	Key Policies in India's Transport Sector in the Alternative Policy Scenario	548
18.6	Key Policies in India's Residential and Services Sectors in the Alternative Policy Scenario	552
18.7	Payback Periods for Lighting in the Services Sector and Motors in Industry	557
18.8	Cumulative Fossil-Fuel Import Bills in the Reference and Alternative Policy Scenarios	557

Chapter 19. High Growth Scenario Projections

19.1	Key Assumptions in the High Growth Scenario	561
19.2	India's Energy Demand in the High Growth Scenario	562
19.3	Incremental Oil Production from the Deployment of Enhanced Oil Recovery in the High Growth Scenario	566
19.4	Cumulative Fossil Fuel Import Bills in the Reference and High Growth Scenarios	568

Chapter 20. Focus on Energy Poverty

20.1	Number of People in India without Access to Electricity and Relying on Biomass in the Reference and High Growth Scenarios	575
20.2	Energy Development Index	578
20.3	Costs of Electrifying Households in India	581
20.4	Cities with More than One Million Inhabitants and Share of Population Living in Slums	587

List of Boxes

Introduction

1. Modelling Improvements for *WEO-2007* 58

Part A: Global Energy Prospects: Impact of Developments in India and China

Chapter 1. Global Energy Trends

- 1.1 Major Energy Developments since *WEO-2006* 75
1.2 Renewable Energy in the Alternative Policy Scenario 106

Chapter 3. International Trade and the World Economy

- 3.1 Measuring and Comparing Gross Domestic Product 137
3.2 Modelling Economic and Energy Interlinkages: the WEM-ECO Model 150

Chapter 4. The World's Energy Security

- 4.1 IEA Emergency Response Mechanisms 162
4.2 Gas Exporting Countries Forum 187

Chapter 5. Global Environmental Repercussions

- 5.1 Regional Air Quality 197
5.2 Which Countries Emit the Most CO₂? 200
5.3 IPCC Fourth Assessment Report 205
5.4 Major CO₂ Capture and Storage Projects 219

Chapter 6. Energy Policy Ramifications

- 6.1 Co-operative Activities Between the IEA and India and China 232
6.2 Bilateral Co-operation between IEA Members and China and India: Three Examples 234
6.3 IEA Implementing Agreements and Technology Network 237

Part B: China's Energy Prospects

Chapter 7. Political, Economic and Demographic Context

- 7.1 China's 11th Five-Year Plan 248

Chapter 8. Overview of the Energy Sector

- 8.1 China's Energy Statistics 264
8.2 Energy Goals in China's 11th Five-Year Plan 271
8.3 Coal-Based Alternative Fuels 293
8.4 Access to Electricity in China 281

Chapter 9. Reference Scenario Demand Projections		
9.1	Recent Energy Trends in China	287
9.2	Prospects for Alternative Transport Fuels in China	299
9.3	China's Car Market	300
9.4	Natural Gas Use in Towns and Cities	306
9.5	Household Use of Biomass and Coal	312
9.6	China and the Clean Development Mechanism	314
Chapter 10. Reference Scenario Supply Projections		
10.1	Restructuring of China's Oil Sector	322
10.2	China's Emergency Oil Stocks	327
10.3	Coal Mining Safety in China	338
10.4	CO ₂ Capture and Storage in China	347
Chapter 11. Alternative Policy Scenario Projections		
11.1	Impact of Climate Change on China	371
11.2	Cost-Effectiveness of Improving Industrial Motor System Efficiency in China	386
Chapter 12. High Growth Scenario Projections		
12.1	Prospects for Enhanced Oil Recovery in China	396
Chapter 13. Focus on the Coastal Region		
13.1	Provincial Energy Statistics and Modelling of the Coastal Region	405
Part C: India's Energy Prospects		
Chapter 14. Political, Economic and Demographic Context		
14.1	India's Five-Year Plans	428
14.2	Special Economic Zones in India	438
Chapter 15. Overview of the Energy Sector		
15.1	India's Energy Statistics	447
15.2	India's New Exploration Licensing Policy	453
15.3	Public-Private Partnerships	461
Chapter 16. Reference Scenario Demand Projections		
16.1	Feedstock for India's Fertilizer Industry	470
16.2	Recent Slow Growth in Transport Fuel Demand	472
16.3	Upside Potential of Transport Oil Demand in India	475
16.4	Rural and Urban Household Energy Demand Projections	477

16.5	Kerosene Use in Rural Areas of India	478
16.6	Energy and Water Use in the Agricultural Sector	484
Chapter 17. Reference Scenario Supply Projections		
17.1	India's Emergency Oil Stocks	496
17.2	Coal Mining Productivity	507
17.3	Coal-Fired Power Plant Technology in India	512
17.4	CO ₂ Capture and Storage	514
17.5	India's Nuclear Power Generation Programme	515
Chapter 18. Alternative Policy Scenario Projections		
18.1	The Impacts of Climate Change in India	539
18.2	Performance of India's Coal-Fired Power Plants	542
18.3	Energy Savings in Cement Production	547
18.4	Delhi Transport Solutions	551
Chapter 19. High Growth Scenario Projections		
19.1	The Vehicle Stock in the High Growth Scenario	564
Chapter 20. Focus on Energy Poverty		
20.1	Energy Efficiency of Cooking Fuels and Technologies in India	575
20.2	Energy Poverty and Gender	583
20.3	Deepam LPG Scheme in Andhra Pradesh	585

List of Spotlights

Part A: Global Energy Prospects: Impact of Developments in India and China

Chapter 1. Global Energy Trends

What is Stopping Governments from Implementing New Policies?	98
--	----

Chapter 2. Energy Trends in India and China

Are China and India Following the Same Energy Development Path?	124
---	-----

Chapter 3. International Trade and the World Economy

Which Countries Gain Most from Economic Growth in China and India?	147
--	-----

Chapter 4. The World's Energy Security

Do China's and India's Equity Oil Acquisitions Improve Energy Security?	179
---	-----

Chapter 5. Global Environmental Repercussions

Can China and India Ever Mirror Western Lifestyles?	215
---	-----

Part B: China's Energy Prospects

Chapter 7. Political, Economic and Demographic Context

Will Government Efforts to Adjust China's Economic Structure Work?	253
--	-----

Chapter 8. Overview of the Energy Sector

How Big are China's Energy Subsidies?	280
---------------------------------------	-----

Chapter 9. Reference Scenario Demand Projections

How Much of China's Energy Use Goes to Making Export Goods?	290
---	-----

Chapter 11. Alternative Policy Scenario Projections

How Much Would More Coal-to-Liquids Increase China's CO ₂ Emissions?	367
---	-----

Part C: India's Energy Prospects

Chapter 14. Political, Economic and Demographic Context

Will Economic Growth Solve India's Problem of Rural Poverty?	433
--	-----

Chapter 15. Overview of the Energy Sector

Why Does the Government Need to Reform Gas Prices?	448
--	-----
