

# Table of Contents

<b>Foreword</b> .....	<b>3</b>
<b>Acknowledgements</b> .....	<b>5</b>
<b>Executive Summary</b> .....	<b>15</b>
Background .....	15
Market developments .....	15
RE competitiveness and economic support .....	17
Policy indicators .....	18
Policy principles and priorities .....	21
Key challenges .....	27
Recommendations .....	29
<b>Chapter 1 Introduction</b> .....	<b>31</b>
Background .....	31
Context .....	32
Progress .....	32
Novel challenges .....	32
This publication .....	33
<b>Chapter 2 Market Development for RE Technologies</b> .....	<b>35</b>
Technology portfolio .....	35
Deployment and cost trends: electricity .....	36
General deployment trends .....	36
Regional deployment trends .....	38
Cost trends and scope for improvement .....	42
Deployment and cost trends: heat .....	49
General and regional deployment trends .....	49
Cost trends and scope for improvement .....	50
Deployment and cost trends: transport .....	51
General and regional deployment trends .....	51
Cost trends and scope for improvement .....	53
Recent global investment trends .....	55
Current trends and the IEA WEO 450 Scenario .....	55

RE technologies within the <i>WEO 2010</i> 450 Scenario . . . . .	56
Electricity . . . . .	57
Heat . . . . .	60
Transport . . . . .	60
<b>Opportunities for expanding deployment . . . . .</b>	<b>61</b>
<b>Key challenges . . . . .</b>	<b>61</b>
Electricity . . . . .	61
Heat . . . . .	62
Transport . . . . .	62
<b>Priorities . . . . .</b>	<b>63</b>
<b>Chapter 3 Policies for Deploying Renewables . . . . .</b>	<b>65</b>
<b>Introduction . . . . .</b>	<b>65</b>
<b>Renewable energy: drivers and benefits . . . . .</b>	<b>66</b>
Energy security . . . . .	66
Reduction of CO <sub>2</sub> emissions and environmental impacts . . . . .	67
Economic development . . . . .	68
Innovation and industrial development . . . . .	67
Mapping policy drivers: the energy security/GDP matrix . . . . .	71
<b>Barriers to RE technology deployment . . . . .</b>	<b>74</b>
Economic barriers . . . . .	74
Non-economic barriers . . . . .	74
Barriers in the electricity sector . . . . .	75
Barriers in the heat sector . . . . .	76
Barriers in the transport sector . . . . .	77
<b>Tackling economic barriers to deployment . . . . .</b>	<b>77</b>
Why provide economic support for technologies? . . . . .	77
Objectives of economic support policies . . . . .	79
Support policy options for the electricity sector . . . . .	79
Support policy options for the heat sector . . . . .	85
Support policy options for the transport sector . . . . .	88
<b>Tackling non-economic barriers . . . . .</b>	<b>89</b>
The price of policy risks: empirical evidence . . . . .	94
<b>The deployment journey . . . . .</b>	<b>95</b>
Stages on the journey . . . . .	97
Developing a national market . . . . .	99
Overarching policy requirements . . . . .	100
Market inception . . . . .	101
Take-off . . . . .	102

Market consolidation . . . . .	104
Market design. . . . .	105
<b>Chapter 4 Economic Support Policies for Electricity: Impact and Cost-Effectiveness Indicators . . . . .</b>	<b>107</b>
Methodological approach. . . . .	108
Regional and technology coverage. . . . .	108
Policy impact indicator (PII) . . . . .	108
Remuneration adequacy indicator (RAI) . . . . .	111
Total cost indicator (TCI) . . . . .	114
Indicator analysis for onshore wind . . . . .	115
Policy impact indicator. . . . .	115
Remuneration adequacy indicator . . . . .	116
Remuneration adequacy versus impact analysis. . . . .	117
Total cost indicator. . . . .	121
Indicator analysis for solar PV . . . . .	121
Policy impact indicator. . . . .	121
Remuneration adequacy indicator . . . . .	124
Remuneration adequacy versus impact analysis. . . . .	124
Total cost indicator. . . . .	127
Conclusions about electricity support policy tools . . . . .	130
<b>Chapter 5 Going Global. . . . .</b>	<b>133</b>
Market trends . . . . .	134
Renewable electricity. . . . .	134
Renewable heat . . . . .	138
Renewable transport. . . . .	140
Regional investment trends. . . . .	142
Policies. . . . .	143
General trends . . . . .	143
Policy developments by region. . . . .	146
Accelerating deployment in a broader range of countries. . . . .	155
Role of international cooperation . . . . .	158
Sharing costs . . . . .	158
Sharing experience. . . . .	159
Facilitating global deployment expansion. . . . .	159

Chapter 6 <b>Conclusions and Recommendations</b> . . . . .	<b>161</b>
Market developments . . . . .	161
RE competitiveness and economic support. . . . .	161
Policy indicators. . . . .	162
Policy principles and priorities . . . . .	162
Inception . . . . .	164
Take-off . . . . .	164
Consolidation. . . . .	165
<b>Key challenges</b> . . . . .	<b>167</b>
Electricity . . . . .	167
Heat . . . . .	167
Transport . . . . .	167
<b>Recommendations</b> . . . . .	<b>168</b>
Annex A <b>Definitions, abbreviations, acronyms and units.</b> . . . . .	<b>171</b>
Annex B <b>References</b> . . . . .	<b>177</b>

**List of Figures**

**Executive summary**

Figure E.1	• Regional trends in non-hydro power generation, 2000-09 . . . . .	16
Figure E.2	• Factors influencing RE competitiveness and the role of policies . . . . .	17
Figure E.3	• Cost-effectiveness and policy impact indicators for onshore wind support policies, 2008/09. . . . .	19
Figure E.4	• Total cost of policy support in major PV markets, 2010 . . . . .	20
Figure E.5	• Deployment journey . . . . .	22
Figure E.6	• Expanding RE deployment . . . . .	28

**Chapter 2**

Figure 2.1	• Selected RE sources and technologies. . . . .	35
Figure 2.2	• Growth in global power generation from renewable sources, 2000-09 . . . . .	37
Figure 2.3	• Growth in global power generation from non-hydro RE sources, 2000-09 . . . . .	37
Figure 2.4	• Regional trends in non-hydro power generation, 2000-09 . . . . .	38
Figure 2.5	• Developments in hydro power generation, 2000-09 . . . . .	39
Figure 2.6	• Global hydropower projects under construction, additional cumulative capacity by year of expected commissioning . . . . .	39
Figure 2.7	• Evolution of wind installed capacity (including offshore), 2000-10 . . . . .	40

Figure 2.8	• Global bioenergy power production, 2000-09 . . . . .	41
Figure 2.9	• Global installed PV capacity, 2005-10 . . . . .	42
Figure 2.10	• Evolution of market shares in PV module production, 2009 and 2010 . . . . .	43
Figure 2.11	• Electricity generation from geothermal energy, 2000-09 . . . . .	43
Figure 2.12	• Investment costs of Danish onshore wind projects and global average full load hours . . . . .	45
Figure 2.13	• Cost degression of solar PV modules, 1976-2010 . . . . .	47
Figure 2.14	• Bioenergy usage for heat, 2000-09 . . . . .	49
Figure 2.15	• Non-bioenergy usage for heat, 2000-09 . . . . .	50
Figure 2.16	• Installed solar water heater capacity, 2000-09 . . . . .	50
Figure 2.17	• Development of biofuels markets, 2000-09 . . . . .	52
Figure 2.18	• Projected costs of biofuels compared to petroleum gasoline, 2010-50 . . . . .	54
Figure 2.19	• Global new investments in renewable energy, 2004-10, billion USD. . . . .	55
Figure 2.20	• Shares of RE technologies in each sector in 2035 according to <i>WEO 2010</i> scenarios . . . . .	56
Figure 2.21	• Renewable power generation 2000-09 and <i>WEO 450</i> projection for 2020 . . . . .	58
Figure 2.22	• Achieved versus required growth rates of RE technologies . . . . .	59
Figure 2.23	• Biofuels production 2000-09 and <i>WEO 450</i> projection for 2020 . .	60
 <b>Chapter 3</b>		
Figure 3.1	• Regional shares in attributed CO <sub>2</sub> savings in 2008 . . . . .	67
Figure 3.2	• Typology of country clusters by strategic policy drivers. . . . .	72
Figure 3.3	• Changes in percentage share of RE technologies in power generation, 1990-2009. . . . .	72
Figure 3.4	• Changes in biofuels share, 1990-2009 . . . . .	73
Figure 3.5	• Barriers to RE technology deployment. . . . .	74
Figure 3.6	• Different dimensions of RE technology competitiveness . . . . .	78
Figure 3.7	• Duration for developing small-scale roof-top PV projects in selected EU countries . . . . .	91
Figure 3.8	• Investors' implicit willingness-to-accept certain policy risks for wind energy investments . . . . .	94
Figure 3.9	• Wind power diffusion in Denmark and the world, 1980-2008 . . . .	95
Figure 3.10	• Deployment journey . . . . .	98
Figure 3.11	• Maturity of selected RE technologies. . . . .	99
Figure 3.12	• Flexibility Assessment Tool (FAST) . . . . .	105
 <b>Chapter 4</b>		
Figure 4.1	• Illustration of the policy impact indicator (PII). . . . .	109
Figure 4.2	• Calculation of the remuneration adequacy indicator (RAI) . . . . .	113

Figure 4.3	• PII of wind support policies in OECD and BRICS countries, 2001-09 . . . . .	116
Figure 4.4	• RAI for onshore wind support policies in OECD and BRICS countries, 2008/09 . . . . .	117
Figure 4.5	• RAI vs. PII for onshore wind support policies, 2008/09. . . . .	118
Figure 4.6	• Total cost indicator for onshore wind, 2009 . . . . .	120
Figure 4.7	• PII of solar PV support policies in OECD and BRICS, 2001-09. . . . .	122
Figure 4.8	• PII of solar PV support policies in selected OECD and BRICS, 2001-10 . . . . .	123
Figure 4.9	• RAI of solar PV support policies in OECD and BRICS countries, 2008/09 . . . . .	124
Figure 4.10	• PII and RAI of solar PV support policies in selected OECD and BRICS countries. . . . .	125
Figure 4.11	• Total cost indicator for solar PV in major markets, 2010. . . . .	127
Figure 4.12	• Spot market prices for solar-grade polysilicon and evolution of German PV system retail prices . . . . .	130

## Chapter 5

Figure 5.1	• Segmentation of renewable electricity production by region, with and without hydro power, 2009 . . . . .	135
Figure 5.2	• Non-hydro renewable electricity market share by country, 2009 . . . . .	130
Figure 5.3	• Financial new investment in renewable energy, 2004-10, billion USD. . . . .	142
Figure 5.4	• Expanding deployment to all clusters . . . . .	156

## List of Tables

### Executive summary

Table E.1	• Best practice policy principles . . . . .	23
-----------	---	----

### Chapter 2

Table 2.1	• Power generation and growth rates (CAGR), 2000-09 . . . . .	36
Table 2.2	• 2009 renewables generation and WEO 450 Scenario targets in 2020, 2030 and 2035. . . . .	56
Table 2.3	• Necessary growth rates to meet 2020 WEO target . . . . .	57
Table 2.4	• Current status and priorities for the three energy sectors. . . . .	64

### Chapter 3

Table 3.1	• Savings in CO <sub>2</sub> emissions between the no-RE scenario and the WEO 450 Scenario in 2030 . . . . .	69
Table 3.2	• Barriers to heat and renewable heat deployment . . . . .	76
Table 3.3	• Characteristics of electricity support mechanisms . . . . .	85
Table 3.4	• Comparison of RE technologies: status, scale, global production and costs . . . . .	96

## Chapter 4

Table 4.1	• Overview of alternative indicators of policy impact . . . . .	108
Table 4.2	• Assumptions for calculating reference intervals for RAI values . . . . .	113
Table 4.3	• Statistical analysis of wind energy support policy types . . . . .	115
Table 4.4	• Normalised remuneration levels per MWh (2009) and PII results (2008/09) for wind power . . . . .	119
Table 4.5	• Statistical analysis of solar PV energy support policy types . . . . .	123
Table 4.6	• Normalised remuneration levels (2009) and PII (2008/09) for solar PV . . . . .	126

## Chapter 5

Table 5.1	• Regional grouping of studied countries . . . . .	133
Table 5.2	• Distributed capacity investments by country, 2010, billion USD . . . . .	143
Table 5.3	• Renewable electricity generation targets, 2005 and 2010 . . . . .	144
Table 5.4	• Policy measures to stimulate take-up of biofuels . . . . .	145
Table 5.5	• Development of the main policy support instruments in OECD countries . . . . .	147
Table 5.6	• Regional overview of policies targeting renewable heat . . . . .	150
Table 5.7	• Regional overview of policies targeting renewable electricity in BRICS . . . . .	151

## Chapter 6

Table 6.1	• Best practice policy principles . . . . .	163
-----------	---	-----
