

# TABLE OF CONTENTS

<b>Executive summary .....</b>	<b>13</b>
<b>1. Recent renewable energy deployment trends .....</b>	<b>17</b>
Highlights .....	17
Electricity .....	18
Technology deployment summary.....	18
Regional deployment summary .....	20
Transport .....	24
Ethanol markets .....	24
Biodiesel markets .....	25
Electric vehicles .....	25
Heat .....	26
References.....	27
<b>2. Renewable electricity forecast .....</b>	<b>28</b>
Highlights.....	28
Technology forecast summary .....	29
Regional forecast summary.....	32
China.....	38
Main case forecast .....	38
Accelerated case forecast .....	42
Asia and Pacific.....	43
India: main case forecast.....	44
Japan: main case forecast .....	47
Other countries in Asia and Pacific: main case forecast .....	49
Asia and Pacific: accelerated case forecast.....	51
North America .....	52
United States: Main case forecast.....	53
Canada: Main case forecast .....	56
Mexico: Main case forecast.....	57
North America: Accelerated case forecast.....	60
Europe .....	61
Germany: Main case forecast.....	62
France: Main case forecast.....	64
United Kingdom: Main case forecast .....	66
Turkey: Main case forecast .....	68
Other countries in Europe: Main case forecast.....	70
Europe: Accelerated case forecast.....	71
Latin America.....	71
Brazil: Main case forecast.....	72

Argentina: Main case forecast.....	74
Chile: Main case forecast .....	75
Latin America: Accelerated case forecast .....	76
<b>SSA .....</b>	<b>77</b>
South Africa: Main case forecast.....	78
Ethiopia: Main case forecast .....	79
Kenya: Main case forecast.....	80
Nigeria: Main case forecast.....	80
Other countries in SSA: Main case forecast .....	81
SSA: Accelerated case forecast.....	82
MENA.....	83
Morocco: Main case forecast .....	84
United Arab Emirates: Main case forecast.....	85
Jordan: Main case forecast.....	86
Other countries in MENA: Main case forecast .....	87
MENA: Accelerated case forecast .....	89
References.....	90
<b>3. Renewable transport .....</b>	<b>93</b>
Highlights.....	93
Overview of renewable energy consumption in road transport.....	94
Conventional biofuel markets .....	95
Global overview.....	95
Could new import tariffs in key markets constrain biofuel trade prospects? .....	99
Ethanol markets regional outlook.....	100
Biodiesel markets regional outlook.....	102
Conventional biofuels accelerated case .....	103
Advanced biofuel markets.....	106
Advanced biofuels main case forecast .....	106
Advanced biofuels accelerated case forecast .....	107
Status update on advanced biofuel projects.....	108
Cellulosic ethanol .....	108
Plants using other technologies .....	109
Project pipeline .....	109
Integrating advanced biofuel technologies into conventional biofuel facilities .....	110
Advanced biofuel policy developments .....	110
Renewable energy consumption by EVs .....	113
Global overview.....	113
Electric cars.....	114
Electric car country targets scenario.....	115
Assessing transport decarbonisation from EVs and biofuels .....	115
References.....	118

<b>4. Renewable heat.....</b>	<b>120</b>
Highlights.....	120
Global overview and outlook .....	121
Outlook for renewable heat technologies .....	124
Bioenergy for heat.....	124
Solar thermal.....	128
Heat pumps .....	132
Geothermal .....	135
Policy developments in key heat markets.....	137
References.....	138
<b>5. Renewable energy technology trends and costs .....</b>	<b>141</b>
Highlights.....	141
Electricity.....	142
Solar PV .....	145
Onshore wind .....	150
Offshore wind.....	153
Hydropower.....	156
Bioenergy.....	159
CSP.....	161
Geothermal .....	163
Transport biofuels .....	165
Prospects for advanced biofuel competitiveness versus fossil transport fuels .....	167
Renewable heat.....	170
References.....	175
<b>6. Data tables.....</b>	<b>177</b>
<b>Glossary.....</b>	<b>180</b>
Regional and country groupings.....	180
List of acronyms, abbreviations and units of measure .....	181

## LIST OF FIGURES

Figure 1.1.	Global total electricity capacity, 2001-16.....	18
Figure 1.2.	Net renewable capacity additions by technology, 2001-16.....	19
Figure 1.3.	Renewable capacity additions in 2016 and <i>MTRMR 2016</i> forecasts .....	19
Figure 1.4.	Global electricity generation by technology, 2001-16 .....	20
Figure 1.5.	Renewable capacity additions in 2015 and 2016 by country/region and technology ..	22
Figure 1.6.	Ethanol (left) and biodiesel (right) production in selected markets, 2015 and 2016 ...	24
Figure 1.7.	Global renewable electricity consumption by EVs (left) and electric cars (right) in 2016.....	26
Figure 1.8.	Total global energy consumption for heat (left) in 2015 and modern renewable heat consumption by source (right) 2009 and 2015 .....	27

Figure 2.1.	Global net renewable capacity growth by technology, historical and forecast.....	29
Figure 2.2.	Global renewable electricity generation by technology (left) versus coal and gas generation (right) .....	31
Figure 2.3.	Global growth in net generation of renewable and fossil fuel electricity.....	31
Figure 2.4.	Variable renewable electricity generation in selected countries, 2016 and 2022.....	32
Figure 2.5.	Net additions to renewable power capacity by selected countries and regions .....	33
Figure 2.6.	Net additions to renewable power capacity under accelerated and main cases by region (left) and technology (right) .....	35
Figure 2.7.	Off-grid PV capacity additions and additional initial access per year from SHSs ..... in Asia (left) and SSA (right), 2016-22.....	36
Figure 2.8.	Breakdown of SHS prices for units purchased with PAYG vs. cash, split by size and provider .....	37
Figure 2.9.	China renewable electricity consumption in 2016, targets for 2020 and percentage wind curtailment in 2016 .....	40
Figure 2.10.	China renewable capacity annual additions (left) and generation (right), 2013-22 .....	41
Figure 2.11.	Asia and Pacific renewable electricity capacity growth, 2010-22 (left) and generation by source, 2016 and 2022 (right) .....	43
Figure 2.12.	Current state-level status of India's UDAY scheme.....	45
Figure 2.13.	India solar PV and onshore wind annual net capacity additions (left), announced ..... solar and wind auction prices versus average coal tariffs (right).....	46
Figure 2.14.	Japan annual net renewable capacity additions, 2015-22 (left) and estimated cancellation and possible installation of solar PV project pipeline (right).....	48
Figure 2.15.	ASEAN cumulative renewable capacity, 2016 and 2022.....	50
Figure 2.16.	North America renewable electricity capacity growth, 2011-22 (left) and ..... generation by source, 2016-22 (right).....	53
Figure 2.17.	United States RPS-driven generation (left) and announced corporate PPAs (right).....	54
Figure 2.18.	United States annual net wind and solar PV capacity additions, 2015-22.....	55
Figure 2.19.	Canada annual net renewable capacity additions, 2016-22 .....	57
Figure 2.20.	Mexico CEL auction results and annual net renewable capacity additions, 2015-22 ...	58
Figure 2.21.	Price differences in Mexican auctions for selected zones (left), example of month- ..... and region-specific hourly adjustment factors, area of Laguna in 2026 (right).....	59
Figure 2.22.	Europe renewable electricity capacity growth, 2011-22 (left) and generation by source, 2016 and 2022 (right) .....	62
Figure 2.23.	Germany onshore wind capacity (left) and PV annual additions by segment (right) ...	63
Figure 2.24.	France annual net renewable capacity additions, 2015-22 (left) and average ..... solar PV winning bids, 2013-17 (right) .....	65
Figure 2.25.	UK annual net renewable capacity additions, 2015-22 (left) and 2017 CFD auction results (right) .....	66
Figure 2.26.	Turkey annual net renewable capacity additions, 2015-22 .....	68
Figure 2.27.	Latin America renewable electricity capacity growth, 2011-22 (left) and generation ..... by source, 2016 and 2022 (right) .....	72
Figure 2.28.	Brazil renewable electricity auction results, 2011-17 (left) and annual net renewable capacity additions, 2015-22 (right).....	73
Figure 2.29.	Argentina RenovAR 1 and 1.5 auction results.....	74
Figure 2.30.	SSA renewable electricity generation by source, 2016 and 2022.....	77

Figure 2.31.	South Africa annual net renewable capacity additions (left), and solar PV annual net additions by segment (right) .....	78
Figure 2.32.	MENA renewable electricity capacity growth, 2011-22 (left) and generation by source, 2016 and 2022 (right) .....	83
Figure 2.33.	Morocco total renewable capacity, 2016 and 2022, and generation, 2015-22 .....	84
Figure 2.34.	United Arab Emirates cumulative renewable capacity (left) and natural gas supply vs power demand (right) .....	85
Figure 2.35.	Jordan annual net renewable capacity additions (left) and solar PV additions by segment (right) .....	87
Figure 3.1.	Overall renewable energy consumption in road transport 2016 (left) and 2022 (right) .....	94
Figure 3.2.	Global conventional biofuel production 2008-22 (left) and forecast output growth in key regions 2017-22 (right) .....	95
Figure 3.3.	Global biodiesel and HVO production 2010-16 (left) and feedstock use for HVO production by Neste 2008-16 (right) .....	97
Figure 3.4.	Indexed gasoline and diesel demand trends for selected countries, 2012-22 .....	97
Figure 3.5.	Global biofuel exports, 2013-16 .....	99
Figure 3.6.	Annual fuel ethanol production in major (left) and other key markets (right), 2008-22 .....	100
Figure 3.7.	Global biodiesel production, 2008-22 .....	103
Figure 3.8.	Advanced and conventional biofuel proposals in the Energy Winter Package .....	106
Figure 3.9.	Forecast annual advanced biofuels production (left) and capacity additions (right) ..	107
Figure 3.10.	Electricity consumption in EVs globally (left) and in electric cars by major market in 2022 (right) .....	113
Figure 3.11.	Carbon intensity of electricity generation in selected EV markets (left) and GHG emissions reduction from selected biofuels under Germany's CPQ (right) .....	116
Figure 3.12.	On-road WTW CO <sub>2</sub> emissions from electric cars for selected countries and regions in 2015 (left) and reference WTW CO <sub>2</sub> emissions from selected biofuels (right) .....	117
Figure 4.1.	Heat in total final consumption, 2015 .....	121
Figure 4.2.	Global final renewable heat consumption (left) and split between sectors (right), 2015 and 2022 .....	122
Figure 4.3.	Renewable heat consumption (left) and share of renewables in heat consumption (right), selected countries/regions, 2015-22 .....	123
Figure 4.4.	Final energy consumption of bioenergy by industry sector in 2015 (left) and global wood pellet production and demand by end use (right) .....	125
Figure 4.5.	Solid biomass consumption for heating in China, 2006-16, and 2020 target .....	127
Figure 4.6.	Solar thermal cumulative capacity by region and global gross additions, 2000-16 .....	129
Figure 4.7.	Net solar thermal consumption growth by sector (left) and by region (right), 2011-22 .....	131
Figure 4.8.	HP sales in Europe by technology, 2005-16 (left) and share of heat pumps per 1 000 households (right) .....	134
Figure 4.9.	Geothermal direct use by country, 2015 .....	135
Figure 5.1.	Fixed remuneration contract type for utility-scale renewable capacity commissioned in 2016 and 2017-22 (left) and by technology (right) .....	142
Figure 5.2.	Onshore wind and solar PV auction capacity and average price by project commissioning date .....	143

Figure 5.3.	Global average LCOEs and auction results for projects by commissioning date .....	143
Figure 5.4.	PV module prices (left), manufacturing capacity and net annual additions (right), 2010-22.....	145
Figure 5.5.	Average solar PV system prices for commissioned projects, 2015-22.....	146
Figure 5.6.	Historical and forecast LCOE range for typical utility-scale solar PV plants versus recent auction results .....	147
Figure 5.7.	Historical and forecast LCOEs for commercial and residential solar PV applications, 2012-22.....	148
Figure 5.8.	LCOE of residential PV vs. average residential electricity price in selected states countries, 2010-16.....	149
Figure 5.9.	Onshore wind annual demand and nacelle manufacturing capacity.....	150
Figure 5.10.	Onshore wind investment costs in selected countries, 2015-22 .....	151
Figure 5.11.	Onshore wind capacity by age, 2017 and 2022 (left), and maintenance cost ranges and annual maintenance market in 2022 by turbine age (right) .....	152
Figure 5.12.	Onshore wind LCOEs for typical systems and recent auctions results, 2009-22 .....	152
Figure 5.13.	Offshore wind investment costs for fully commissioned projects, 2015-25.....	153
Figure 5.14.	Offshore wind turbine size, foundation per MW (left) and LCOE range (right) .....	154
Figure 5.15.	Offshore wind auction results and LCOEs by expected commissioning date .....	155
Figure 5.16.	Hydropower investment costs, 2016 .....	157
Figure 5.17.	Global PSP capacity (left) and generation forecast (right) .....	158
Figure 5.18.	Global investment cost and LCOE ranges for bioenergy technologies .....	159
Figure 5.19.	Announced investment costs and base PPA price of historical and forecast CSP projects (left) and corresponding estimated capacity factors (right) .....	163
Figure 5.20.	Geothermal capacity segmentation by technology (left) and forecast (right).....	164
Figure 5.21.	Indexed costs of onshore oil and gas rigs (left) and well cost structure (right) .....	165
Figure 5.22.	Levelised production costs and feedstock share of production cost for selected conventional biofuels in the United States and Europe.....	166
Figure 5.23.	Brazilian hydrous ethanol consumption and price relative to gasoline (left) and fuel ethanol production versus international sugar price (right), 2015-16.....	167
Figure 5.24.	Impact of carbon taxation on advanced biofuel break-even crude oil price .....	170
Figure 5.25.	Indicative cost ranges for residential renewable heat and fossil fuel alternatives (delivered heat) .....	171
Figure 5.26.	Biomass boiler investment costs by capacity .....	172

## LIST OF TABLES

Table 1.1.	Top five countries/regions for renewable capacity additions by technology in 2016 ..	21
Table 2.1.	Top five countries for renewable capacity growth by technology, 2017-22.....	34
Table 2.2.	China renewable energy targets and achievements under 12th FYP, 13th FYP targets and <i>Renewables 2017</i> main case forecast for 2020.....	39
Table 2.3.	China main drivers for and challenges to renewable energy deployment .....	42
Table 2.4.	China renewable electricity capacity projection (GW), main and accelerated case.....	43
Table 2.5.	Asia and Pacific drivers and challenges to renewable energy deployment .....	51
Table 2.6.	Asia and Pacific main and accelerated cases summary, 2016 and 2022.....	52

Table 2.7.	North America drivers and challenges to renewable energy deployment .....	60
Table 2.8.	North America main and accelerated cases summary, 2016 and 2022 .....	61
Table 2.9.	Europe drivers and challenges to renewable energy deployment .....	69
Table 2.10.	Europe main and accelerated cases cumulative capacity, 2016 and 2022 .....	71
Table 2.11.	Latin America drivers and challenges to renewable energy deployment .....	76
Table 2.12.	Latin America main and accelerate cases summary, 2016 and 2022 .....	77
Table 2.13.	SSA main drivers and challenges to renewable energy deployment .....	81
Table 2.14.	SSA main and accelerated case summary, 2016 and 2021 .....	83
Table 2.15.	MENA drivers and challenges to renewable energy deployment .....	87
Table 2.16.	MENA main and accelerated cases summary, 2016 and 2021 .....	90
Table 3.1.	Global conventional biofuel production .....	96
Table 3.2.	Mandates, targets and support policies for biofuels in selected countries .....	98
Table 3.3.	Annual fuel ethanol production: accelerated case (billion L) .....	104
Table 3.4.	Annual biodiesel and HVO production: accelerated case (billion L) .....	105
Table 4.1.	Global trends and forecast for renewable heat, 2010-22 .....	123
Table 4.2.	Bioenergy drivers and challenges: industrial and district heating applications .....	125
Table 4.3.	Solar thermal heating drivers and challenges .....	130
Table 4.4.	HP drivers and challenges .....	133
Table 4.5.	Geothermal heating drivers and challenges .....	136
Table 5.1.	2016-17 bioenergy auction results .....	160
Table 5.2.	Cellulosic ethanol and W&R HVO feedstock cost estimates .....	169
Table 5.3.	End-user heating fuel price comparison .....	174
Table 6.1.	Ethanol production (billion litres) .....	177
Table 6.2.	Biodiesel production (billion litres) .....	177
Table 6.3.	Total renewable electricity capacity (GW) .....	178
Table 6.4.	Total renewable electricity generation (TWh) .....	179

## LIST OF BOXES

Box 1.1.	Implications of Brexit on the UK renewable energy market .....	67
Box 2.1.	Off-grid solar PV: an initial step to electrification in developing Asia and SSA .....	36
Box 2.2.	Mexican energy auction design and grid integration .....	58
Box 3.1.	Key biofuels proposals within the European Commission's 2016 "Energy Winter Package" .....	105
Box 3.2.	Two new global initiatives could support accelerated biofuel market growth .....	108
Box 3.3.	A portfolio of biofuels offers diesel alternatives in road freight transport .....	111
Box 3.4.	Estimation of EV renewable electricity consumption: methodology explanation .....	113
Box 4.1.	Modern renewable heat technologies .....	122
Box 4.2.	Scaling up solid biomass heating in China .....	127
Box 4.3.	Geothermal district heating in Hungary .....	136
Box 5.1.	China solid biomass and natural gas economic assessment .....	173
