# Table of contents

Executive summary .....	13
Introduction.....	21
<b>1</b> Tackling climate change in the electricity sector.....	25
Emission trends and energy realities.....	25
Climate change stabilisation and electricity.....	28
The importance of demand-side efficiency improvements.....	30
Summary .....	36
<b>2</b> Presenting options for international sectoral approaches.....	37
Electricity and climate in developing countries: lessons from the Clean Development Mechanism .....	38
Proposed policy approaches beyond 2012.....	46
The rationale for sectoral approaches .....	47
Sectoral approaches under the UNFCCC.....	48
International sectoral initiatives and fora related to electricity .....	59
Conclusion.....	65
<b>3</b> Policy options to transform power generation.....	69
Introduction.....	69
A sobering message on crediting reductions in power generation.....	71
Baselines for sector-wide crediting in power generation.....	76
Triggering change with sectoral crediting: practical questions .....	85
Sectoral crediting: an intermediary step.....	91
<b>4</b> Targeting carbon lock-in: case studies on electricity.....	95
Introduction and scope .....	95
Electricity generation and consumption overview .....	98
China.....	105
India .....	121
Mexico .....	134
South Africa .....	146
Stepping stones to curb CO <sub>2</sub> from electricity.....	158

**5** Next steps ..... 161

**6** References ..... 167

## List of tables

Table 1	Examples of approved CDM methodologies for retrofitting or improving efficiency of power plants .....	42
Table 2	Metrics for sectoral goals.....	49
Table 3	CO <sub>2</sub> crediting in power generation with a dynamic baseline methodology – Illustrations for China.....	80
Table 4	CO <sub>2</sub> crediting in power generation with a dynamic baseline methodology – Illustrations for India.....	80
Table 5	From performance to credits.....	85
Table 6	Key electricity statistics for China, India, Mexico and South Africa .....	97
Table 7	Evolution of power generation and CO <sub>2</sub> emissions in China in <i>WEO 2008</i> Scenarios (changes from 2007).....	107
Table 8	Main features of China's National Climate Change Programme .....	110
Table 9	Evolution of power generation, CO <sub>2</sub> intensity and emissions in India in <i>WEO 2008</i> scenarios (changes from 2007).....	123
Table 10	Main features of India's National Action Plan on Climate Change....	126
Table 11	Main features of India's National Mission on Enhanced Energy Efficiency (preliminary).....	127
Table 12	Evolution of power generation, CO <sub>2</sub> intensity and emissions in Mexico in <i>WEO 2008</i> scenarios (changes from 2007) .....	136
Table 13	Summary of abatement options and cost in the power sector in various policy scenarios for South Africa.....	153
Table 14	South Africa's renewable energy feed-in tariff.....	156
Table 15	Energy efficiency measures in the four case study countries – a survey from the IEA database .....	159

## List of figures

Figure 1	World anthropogenic greenhouse gas emissions by source, 2005 .....	25
Figure 2	Energy-related CO <sub>2</sub> emissions by 2020 in the Reference Scenario .....	26
Figure 3	CO <sub>2</sub> emissions from existing and new power plants in the Reference Scenario .....	27
Figure 4	Reductions in energy-related CO <sub>2</sub> emissions in IEA climate policy scenarios.....	29
Figure 5	Marginal emission reduction costs for the global energy system, 2050 .....	32
Figure 6	Additional energy-related investment by region in the 450 Policy Scenario, relative to the Reference Scenario, 2010-2030 .....	33
Figure 7	Residential electricity consumption, 1990-2006 .....	35
Figure 8	Project types of issued and expected certified emission reductions from CDM until 2012.....	38
Figure 9	Global CO <sub>2</sub> savings from IEA 25 concrete recommendations.....	57
Figure 10	Energy efficiency gains and the carbon market.....	58
Figure 11	Evolution of plant thermal efficiency during years of operations.....	63
Figure 12	An effective two-tiered approach to international mitigation support.....	67
Figure 13	Breakdown of emission reductions in the electricity sector of Other Major Economies .....	71
Figure 14	From power generation to generating CO <sub>2</sub> credits.....	72
Figure 15	The importance of defining business-as-usual trends in a crediting mechanism.....	81
Figure 16	Incentives for early reductions when the crediting baseline converges with performance.....	83
Figure 17	Sectoral crediting: how to reward individual performance?.....	87
Figure 18	Articulating a sectoral baseline commitment with domestic policy.....	88
Figure 19	Energy-related CO <sub>2</sub> emissions of Other Major Economies in <i>WEO 2008</i> scenarios.....	95

Figure 20	CO <sub>2</sub> emissions of power generation sector in China, India and Mexico in <i>WEO 2008</i> scenarios.....	99
Figure 21	Electricity output in China, India and Mexico in <i>WEO 2008</i> scenarios.....	100
Figure 22	Installed power capacity of China, India and Mexico in <i>WEO 2008</i> scenarios.....	101
Figure 23	Energy sources in power generation sector in China, India, Mexico and South Africa .....	102
Figure 24	Electricity demand by end-use in China, India, Mexico and South Africa .....	103
Figure 25	Breakdown of emission reductions in China, India and Mexico in <i>WEO 2008</i> 450 Policy Scenario.....	104
Figure 26	Electricity production and CO <sub>2</sub> emissions of China in <i>WEO 2008</i> scenarios.....	106
Figure 27	Electricity consumption of China in <i>WEO 2008</i> scenarios .....	107
Figure 28	Electricity generation capacity profile of China in <i>WEO 2008</i> scenarios.....	108
Figure 29	Electricity production and CO <sub>2</sub> emissions of India in <i>WEO 2008</i> scenarios.....	122
Figure 30	Electricity consumption of India in <i>WEO 2008</i> scenarios .....	123
Figure 31	Electricity generation capacity profile of India in <i>WEO 2008</i> scenarios.....	124
Figure 32	Electricity production and CO <sub>2</sub> emissions of Mexico in <i>WEO 2008</i> scenarios.....	134
Figure 33	Electricity consumption of Mexico in <i>WEO 2008</i> scenarios.....	135
Figure 34	Electricity generation capacity profile of Mexico in <i>WEO 2008</i> scenarios.....	139
Figure 35	Power generation, consumption and CO <sub>2</sub> emissions profile of South Africa, 1990-2007 .....	147
Figure 36	Power generation capacity expansion plan in South Africa's "Growth without constraints case", 2003-2050 .....	148
Figure 37	Power generation and CO <sub>2</sub> emissions from power in "Growth without constraints case", 2005, 2020 and 2030.....	149
Figure 38	Strategic options from "Growth without constraints" to "Required by science" .....	152

## List of boxes

Box 1	The <i>World Energy Outlook 2008</i> scenarios .....	30
Box 2	CDM and plant retrofits .....	41
Box 3	Essential elements related to GHG reductions in the Bali Action Plan.....	46
Box 4	Intellectual property rights and barriers to transfer of low-carbon technologies .....	53
Box 5	Breaking the barriers to energy efficiency – the IEA 25 policy recommendations .....	56
Box 6	Eurelectric - Decarbonising power generation by 2050 in Europe .....	59
Box 7	Recommendations of the WBCSD Electricity Utilities Sector Project.....	60
Box 8	The International Partnership on Energy Efficiency Co-operation .....	61
Box 9	Electricity generation activities under the Asia-Pacific Partnership on Clean Development and Climate.....	62
Box 10	e8 climate change activities.....	64
Box 11	Sectoral crediting: an overview of supply and demand .....	74
Box 12	Linking CDM revenues to the promotion of renewables.....	89
Box 13	Regional groups in <i>WEO 2008</i> .....	96
Box 14	A Global Environment Facility project on thermal power efficiency in China.....	113
Box 15	Strategies and recommendations for improving the environmental performance of coal in China .....	117
Box 16	IEA energy efficiency recommendations and industrial energy use in China.....	118
Box 17	Recent developments in China's nuclear energy goals.....	120
Box 18	A CO <sub>2</sub> baseline database for the Indian power sector.....	133
Box 19	Summary of the World Bank low-carbon study for Mexico.....	138
Box 20	A loan to support Mexico's National Climate Change Strategy.....	140
Box 21	Possible phases for the progressive valuation of CO <sub>2</sub> in the Mexican economy.....	141
Box 22	Existing efforts in end-use efficiency in Mexico .....	143
Box 23	South Africa's "Long Term Mitigation Scenarios" .....	151
