	Table of Contents	7
	List of Figures	13
	List of Tables	15
	Executive Summary	19
Chapter 1	▶ INTRODUCTION	31
	Scope of Indicator Analysis	31
	Energy and CO ₂ Saving Potentials	33
	Next Steps	36
Chapter 2	▶ MANUFACTURING INDUSTRY ENERGY USE AND CO₂ EMISSIONS	39
Chapter 3	▶ GENERAL INDUSTRY INDICATORS ISSUES	45
	Energy Indicators Based on Economic and Physical Ratios	45
	Methodological Issues	46
	Definition of Best Available Technique and Best Practice	48
	Data Issues	49
	Practical Application of Energy and CO₂ Emission Indicators	51
	Pulp, Paper and Printing	51
	Iron and Steel	52
	Cement	52
	Chemicals and Petrochemicals	53
	Other Sectors / Technologies	53
	International Initiatives: Sectoral Approaches to Developing Indicators	54
	Intergovernmental Panel on Climate Change Reference Approach	54
	Pulp and Paper Initiatives	55
	Cement Sustainability Initiative	55
	Asia-Pacific Partnership on Clean Development and Climate	56
	Benchmarking in the Petrochemical Industry	56
Chapter 4	▶ CHEMICAL AND PETROCHEMICAL INDUSTRY	59
	Introduction	60
	Global Importance and Energy Use	61
	Petrochemicals Production	64
	Steam Cracking: Olefins and Aromatics Production	66

Propylene Recovery in Refineries and Olefins Conversion	71
Aromatics Extraction	71
Methanol	72
Olefins and Aromatics Processing	74
Inorganic Chemicals Production	75
Chlorine and Sodium Hydroxide	76
Carbon Black	77
Soda Ash	78
Industrial Gases	80
Ammonia Production	82
Combined Heat and Power	85
Plastics Recovery Options	86
Energy and CO₂ Emission Indicators for the Chemical and Petrochemical Industry	87
Energy Efficiency Index Methodology	88
CO ₂ Emissions Index	91
Life Cycle Index	93
Energy Efficiency Potential	94
Chapter 5 ▶ IRON AND STEEL INDUSTRY	95
Introduction	96
Global Importance and Energy Use	96
Indicator Issues	99
System Boundaries	99
Product and Process Differentiation	99
Allocation Issues	99
Feedstock Quality Issues	101
Energy Indicators	102
Energy Intensity Indicators and Benchmarks	102
Energy Intensity Analysis	103
Efficiency Improvements	106
Coke Ovens	108
Coke Oven Gas Use	111
Coke Dry Quenching	111
Iron Ore Agglomeration	113
Ore Quality	115
Blast Furnaces	116
Coal and Coke Quality	119
Coal Injection	120

Plastic Waste Use	121
Charcoal Use	121
Top-Pressure Recovery Turbines	123
Blast Furnace Gas Use	123
Blast Furnace Slag Use	124
Hot Stoves	126
Basic Oxygen Furnaces	126
Basic Oxygen Furnace Gas Recovery	127
Steel Slag Use	127
Electric Arc Furnaces	128
Cast Iron Production	131
Direct Reduced Iron Production	132
Steel Finishing	135
Energy Efficiency and CO₂ Reduction Potentials	136
Chapter 6 ► NON-METALLIC MINERALS	139
Introduction	140
Cement	140
Global Importance and Energy Use	140
Cement Production Process	140
Energy and CO ₂ Emission Indicators for the Cement Industry	162
Lime	163
Overview	163
Lime Production Process	164
Energy Consumption and CO ₂ Emissions from Lime Production	166
Glass	166
Overview	166
Glass Production Process	167
Energy Consumption and CO ₂ Emissions from Glass Production	168
Ceramic Products	169
Overview	169
Ceramics Production Process	172
Energy Consumption and CO ₂ Emissions from Ceramics Production	173
Indicators for Lime, Glass and Ceramics Industries	174
Chapter 7 ► PULP, PAPER AND PRINTING INDUSTRY	175
Global Importance and Energy Use	176
Methodological and Data Issues	176

	Pulp and Paper Production and Demand Drivers	178
	Energy Use in the Pulp and Paper Industry	180
	Pulp Production	182
	Paper Production	183
	Printing	185
	Energy Indicators	187
	Energy Intensity Indicators versus Benchmarking	187
	Energy Efficiency Index Methodology	187
	Expanding Indicators Analysis in the Pulp and Paper Industry	195
	Combined Heat and Power in the Pulp and Paper Industry	196
	Paper Recycling and Recovered Paper Use	198
	Use of Technology to Increase Energy Efficiency and Reduce CO₂ Emissions	200
	Differences in Energy Intensity and CO₂ Emissions across Countries	201
	Energy Efficiency Potentials	204
Chapter 8	▶ NON-FERROUS METALS	207
	Introduction	207
	Global Importance and Energy Use	207
	Aluminium Production	208
	Copper Production	213
	Energy Efficiency and CO ₂ Reduction Potentials	216
Chapter 9	▶ SYSTEMS OPTIMISATION	217
	Introduction	217
	Industrial Systems	218
	Industrial System Energy Use and Energy Savings Potential	218
	Motor Systems	220
	Steam Systems	227
	Barriers to Industrial System Energy Efficiency	231
	Effective Policies and Programmes	231
	Combined Heat and Power	236
	Benefits of CHP	238
	Barriers to CHP Adoption	239
	CHP Statistics	240
	Indicators for CHP Energy Efficiency Benefits	242

Chapter 10	▶ LIFE CYCLE IMPROVEMENT OPTIONS	247
	Introduction	247
	Indicator Issues	247
	Trends in the Efficiency of Materials and Product Use	249
	Buildings	252
	Packaging	252
	Transportation Equipment	254
	Recycling and Reuse	256
	Petrochemical Products	259
	Paper	262
	Aluminium	264
	Steel	265
	Energy Recovery	268
	Petrochemical Products	271
	Paper	273
	Wood	273
Annexes	▶ Annex A • Process Integration	275
	Annex B • Industry Benchmark Initiatives	283
	Annex C • Definitions, Acronyms and Units	287
	Annex D • References	303
