Conclusions

- **Global oil supply growth is plunging, as low prices take their toll**
 - *Iran leads OPEC gains over the forecast period*
 - *Despite a near-term dip, US production rises to an all-time high*
- **While global oil demand growth is slowing, oil use crosses the symbolic 100 mb/d mark towards the end of the decade**
- **The availability of resources that can be easily and quickly tapped set to limit the scope of price rallies – at least in the near term**
- **The historic investment cuts now being seen raise the odds of oil-security surprises in the not-too-distant-future**
