NOTES**ESTIMATED DATA**

Due to the absence of official data, the following data have been estimated:

No estimated countries

COUNTRY NOTES

Australia	Prior to July 2006, all natural gas exports are estimated by the IEA on the basis of OECD imports of natural gas from Australia. Post July 2006, total exports of natural gas are estimated by the administration, based on annual (July to June) and quarterly data. The breakdown of export destinations is estimated by the IEA on the basis of OECD imports of natural gas from Australia.
Austria	The February 2012 trade data are estimated by the IEA.
Belgium	For the period January 2010 to December 2010, the gross inland deliveries and the imports from "Not elsewhere specified" location are estimated by IEA secretariat. The revisions are pending.
Czech Republic	Due to changes in reporting methodology there is a break in series in natural gas stocks for the Czech Republic beginning with January 2010 data. From January 2010 onwards, natural gas stocks represent the stocks held on the national territory of the Czech Republic. Prior January 2010, natural gas stock data included also stocks held in the Slovak Republic that were fully available for use by the Czech Republic. Historical revisions are pending.
France	Beginning with January 2005 data, exports of natural gas include a portion of gas in transit.
Germany	Beginning with January 2010 data, natural gas trade figures have been revised due to the change of the data source.

German imports and exports of natural gas include transit flows.

Iceland

There is no natural gas data for Iceland, as there is neither production nor consumption.

Italy

Cushion gas is excluded from stock levels starting with October 2009, hence there is a break in stocks between September and October 2009. Historical revisions are pending.

Netherlands

Between January 2005 and July 2009, natural gas trade information is published by country of physical location prior to or after crossing Dutch borders. Revisions are pending. Beginning with August 2009 data, natural gas trade data are reported on the basis of ultimate origin and destination.
