## **NOTES**

### **1) ESTIMATED DATA**

Due to the absence of official data, the following data have been estimated:

No estimated countries

### **2) COUNTRY NOTES**

Austria	Most recent data are the best estimates from the Austrian national administration based on available preliminary data. Data are usually finalized within 6 months of first publication.
Canada	Most recent data are the best estimates from the Canadian national administration based on available preliminary data. Data are usually finalized within 3 months of first publication.
Greece	Stock levels and the deliveries to main activity producer power plants previously reported as Transport Diesel have been reclassified as Heating Oil/Other Gasoil for data from 2006 to present.
Mexico	Due to reporting methodology changes, data for Mexico include breaks in series beginning with January 2011 data. These breaks in series include products transferred amounts for different products as well as NGL refinery intake. Revisions to historical data are pending.
United Kingdom	Beginning with January 2009 data, a small portion Motor Gasoline and Gas/Diesel Oil have been reclassified as Additives/Oxygenates due to UK administration methodology changes.
