

Aims of the Workshop

Dr. Peter Taylor
Co-ordinator G8 Indicators Task

Paris, 25-26 October 2007

©OECD/IEA, 2007

Overall Aims

- **Share information about using indicators to support energy efficiency and other policy**
- **Discuss methodologies and data sources for developing indicators**
- **Guide the IEA's immediate work to develop new indicators for 2008 G8 meeting**
- **Discuss longer term aims for an indicators framework to support national analyses and cross-country comparisons**

Key Issues

- **Current use of indicators to support energy efficiency policy development and evaluation**
- **Need for new indicators to better understand patterns and trends in energy use and efficiency**
- **Data to support the development of these new indicators – availability and gaps**
- **Getting the missing data – who, how, when**
- **Priorities for future IEA indicators work and co-operation with governments, analysts and other experts**

Structure

Today

- **Session 1: Current use of indicators**
- **Session 2: Collecting data**
- **Session 3 & 4: Indicators for Buildings**

● Tomorrow

- **Session 5 & 6: Indicators for Appliances**
- **Session 7: Future directions**
- **Session 8: Conclusions**

Thank you !
