

Bridging the gap between modellers and decision makers

**International Energy Workshop
Paris, 30 June 2008**

Paul WATKINSON, France

Some key needs in 2008 and 2009

- Intense negotiations to reach deal in Copenhagen – need to work on details of future regime and understand global goals
- Bridge gap top down / bottom up
- Understand what all options mean – mitigation, also impacts and adaptation, action on technologies and financing ... and all sectors
- All parties need to make choices in negotiations, but imbalance in access to modelling information
- Beyond theoretical debate – need to understand what change for key real world choices

Some key needs in 2008 and 2009

- Mitigation costs
- Options for differentiation and comparability of efforts
- Possible new types of contributions – efforts, action on climate and development
- Implications of rules for LULUCF
- Supply and demand on carbon market
- Mobilising investment for mitigation
- Financing adaptation
- Understanding « MRV »
- Managing transition to low carbon economy
