Ministry of Mining and Energy

Oil forum and Oil industry in the region

Mr Zoran Filipović, Assistant Minister

24 – 25 September, 2009

Decision No 2008/03/MC-ENC, as of 11th December 2008

- implementation to the oil sector of certain provisions of the Treaty in oil sector;
- the creation of Energy Community Oil Forum;

An Oil Forum shall advise the Energy Community on matters related with the oil sector

- the «Network Energy» shall be understood as to include the oil sector, i.e. supply, trade, processing and transport of crude oil and petroleum products falling within the scope of European Commission Directive 2006/67/EC and the related pipelines, storage, refineries and import/export facilities

Characteristics of Oil sector in the region:

- different approaches to the organization of oil market;
- the lack of reliable data and information.

The Oil forum could be the **permanent focal point** for oil sector in Energy Community, which will provide **permanent assistance to Energy Community Secretariat in the oil field**, with following activities:

- Providing further support to additional inter-connections of the already existing and future pipelines transporting crude oil and petroleum products in Energy Community;
- Coordinating the activities in the Energy Community aiming to harmonize regulations and provide security of mandatory crude oil and petroleum derivatives reserves, as per Directive 2006/67/EC;
- Constantly analyzing the petroleum derivative markets in Energy Community;
- Establishing regional monitoring of petroleum products quality;
- Transferring the best practice of Energy Community in refining crude oil;
- Analyzing the existing and future import/export terminals in Energy Community.

Basic work modalities:

1. In cooperation with the Energy Community Secretariat, the coordination in regard to preparation of various studies, analyses, data-bases as well as other documents closely related to oil/petroleum products sector in Energy Community;

- Organization of thematic one-day meetings, or several day workshops and conferences discussing specific oil/petroleum products topics;
- Organization of thematic meetings and discussions, as a neutral point, for top management of oil companies in the Energy Community.

Organization approach

- Oil Forum could be technically supported by the Serbian state owned company Public Enterprise Transnafta (office space, IT support, administrative officer).
- The oil companies could support activities of Oil forum regarding research and development, especially the development on oil stocks and infrastructure oil projects.
