Björn Stigson, President, WBCSD

“Tracking Industrial Energy Efficiency and CO₂ Emissions”

This publication uses the best publicly available statistics combined with innovative methodologies to examine trends in worldwide industrial energy efficiency and estimate the additional technical savings potential.

Debra Justus, IEA
Bruno Vanderborght, Holcim

“Sectoral Approaches to Greenhouse Gas Reductions”

How to handle competitiveness concerns and the need to expand the climate mitigation regime?

Howard Klee, Cement Sustainability Initiative, WBCSD
Richard Baron, IEA

“Energy Technology Perspectives: Scenarios and Strategies to 2050”

How a portfolio of current and emerging energy technologies can make a difference to enhance energy security and contain growth in CO₂ emissions?

Debra Justus, IEA
Richard Armand, Entreprises pour l'Environnement
Russell Mills, Dow Chemicals
