

Ministry of Infrastructure and Water Management

The Netherlands' approach to Sustainable Urban Freight

Pilot City Program Shenzhen

Gerben Passier
Senior policy advisor Sustainable Mobility

15 November 2019

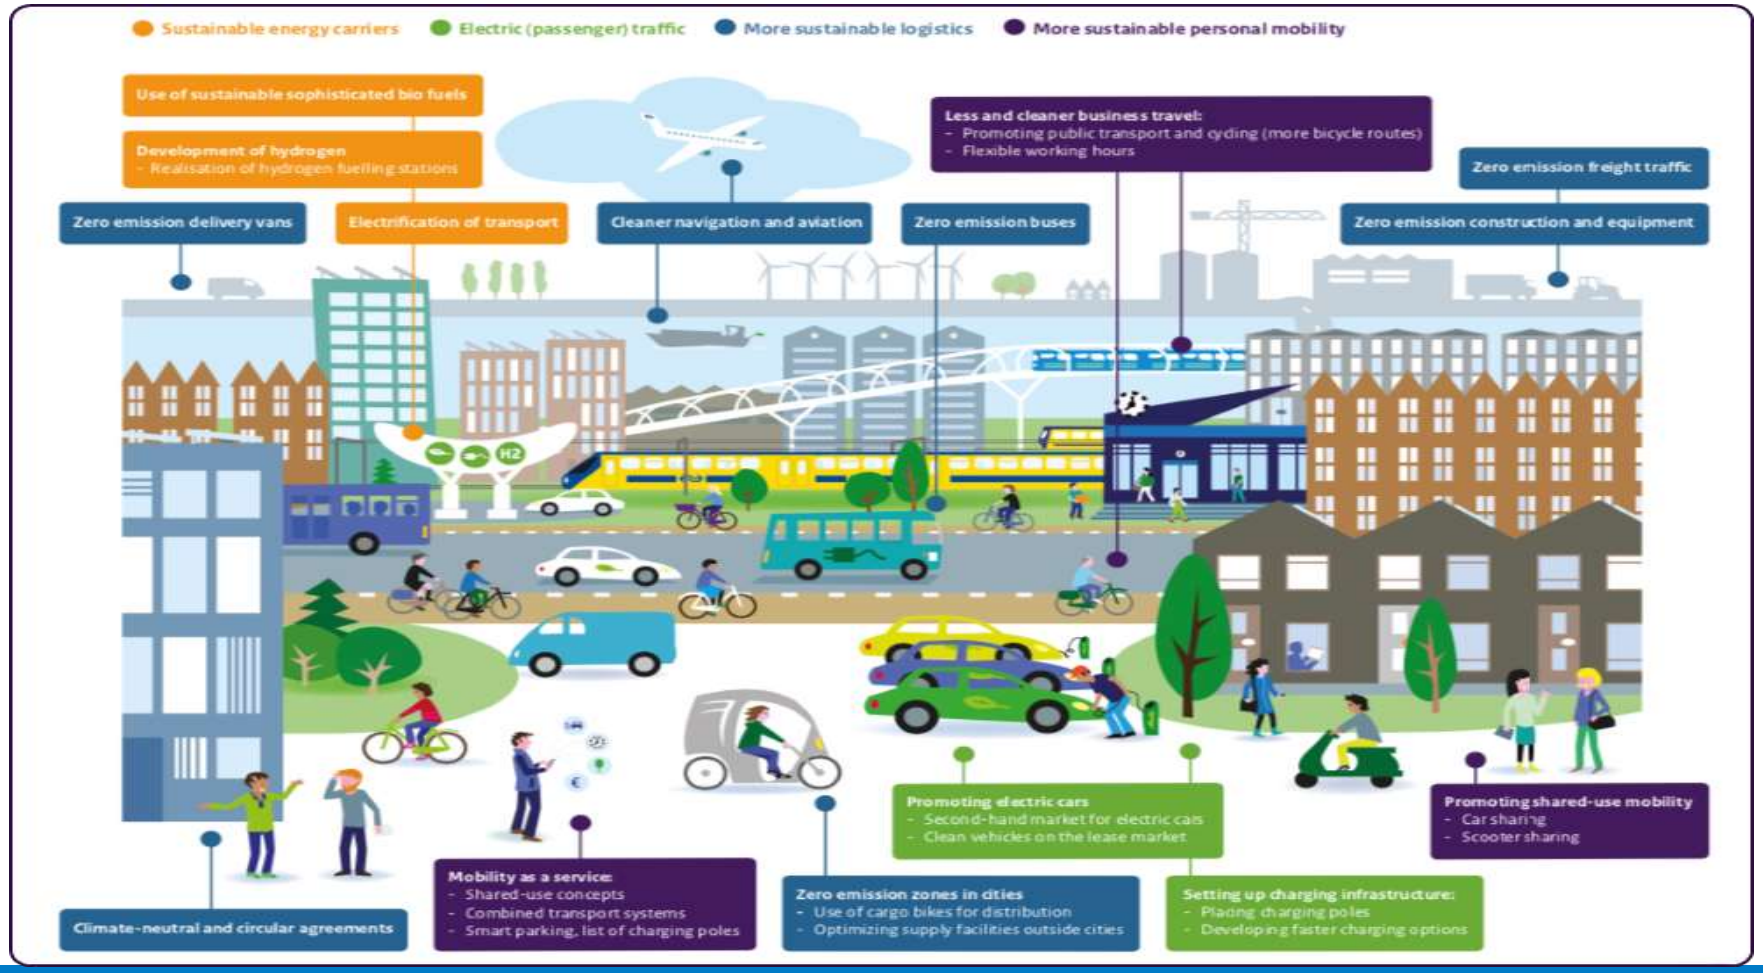

Succes factors for uptake of ZEV (NEV)

- Government leadership: ambitions followed by strict legislations
  - Ambition of 100% ZEV sales in 2030
  - Zero Emission Zones in 40 major cities in 2025

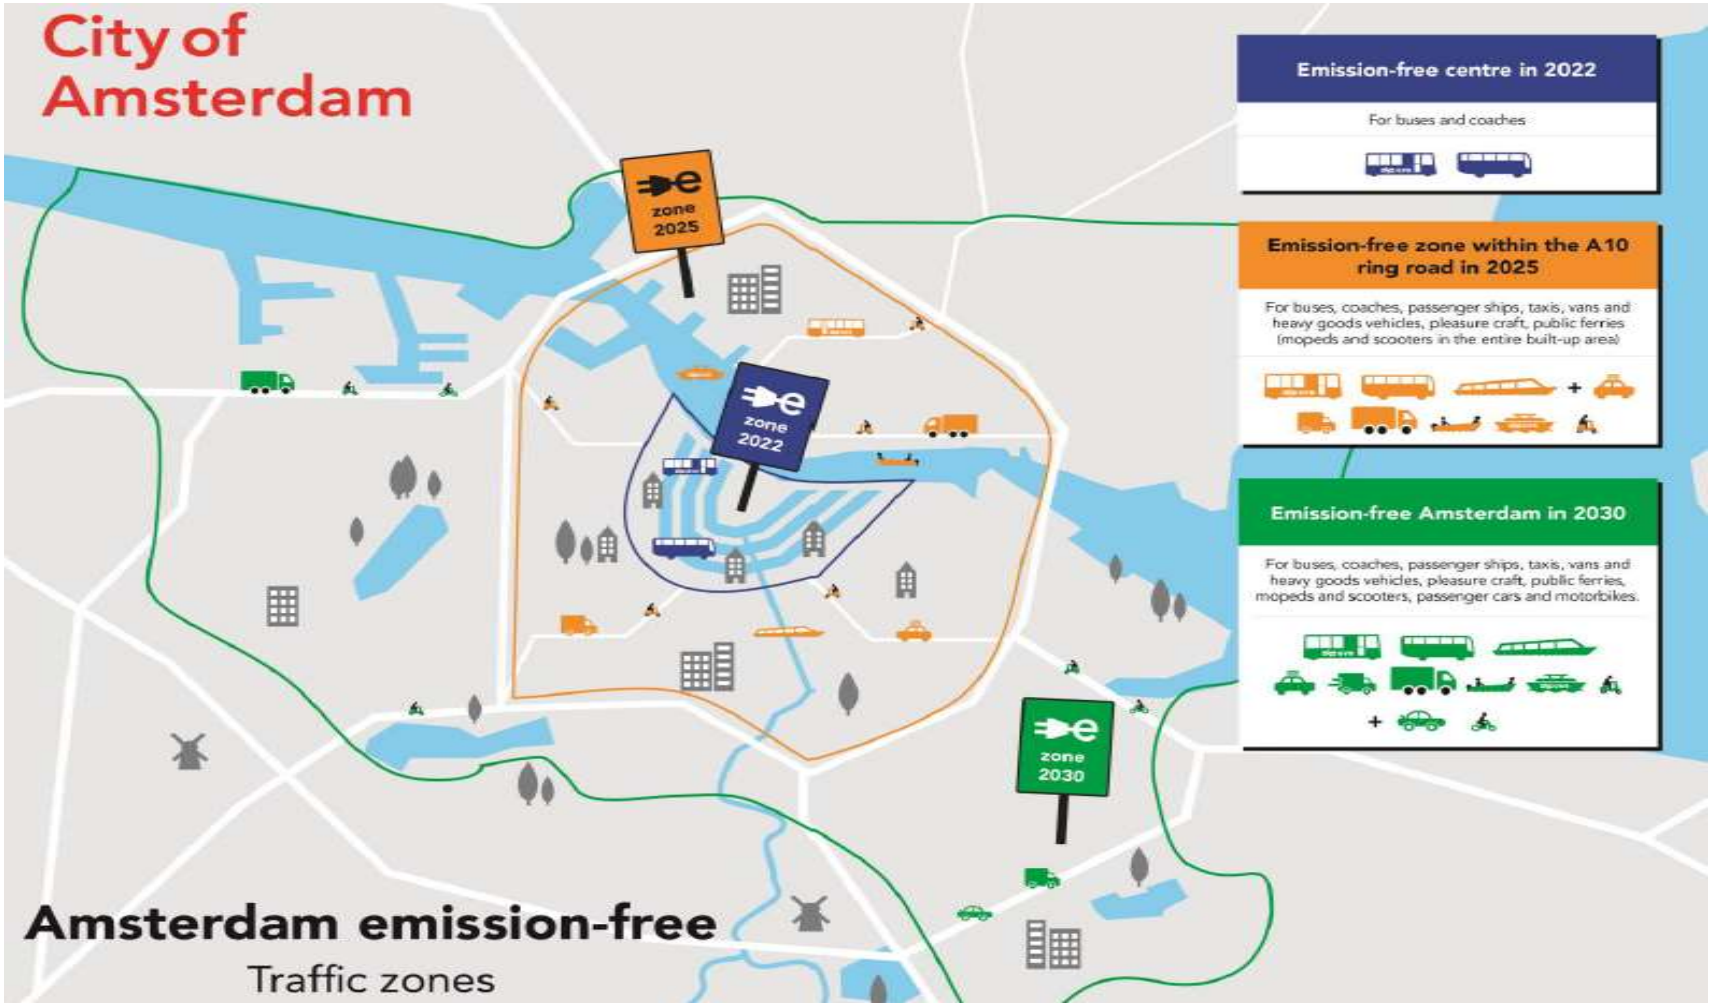

- Public Private Cooperation
  - Start with front runners segment by segment
  - Also at local and international level
  - Demand gathering to increase availability of ZE vehicles

- Proactively roll-out charging infrastructure
  - Public charging infra
  - Smart grids

Current status of the National Climate Agreement
国家气候协议的现状

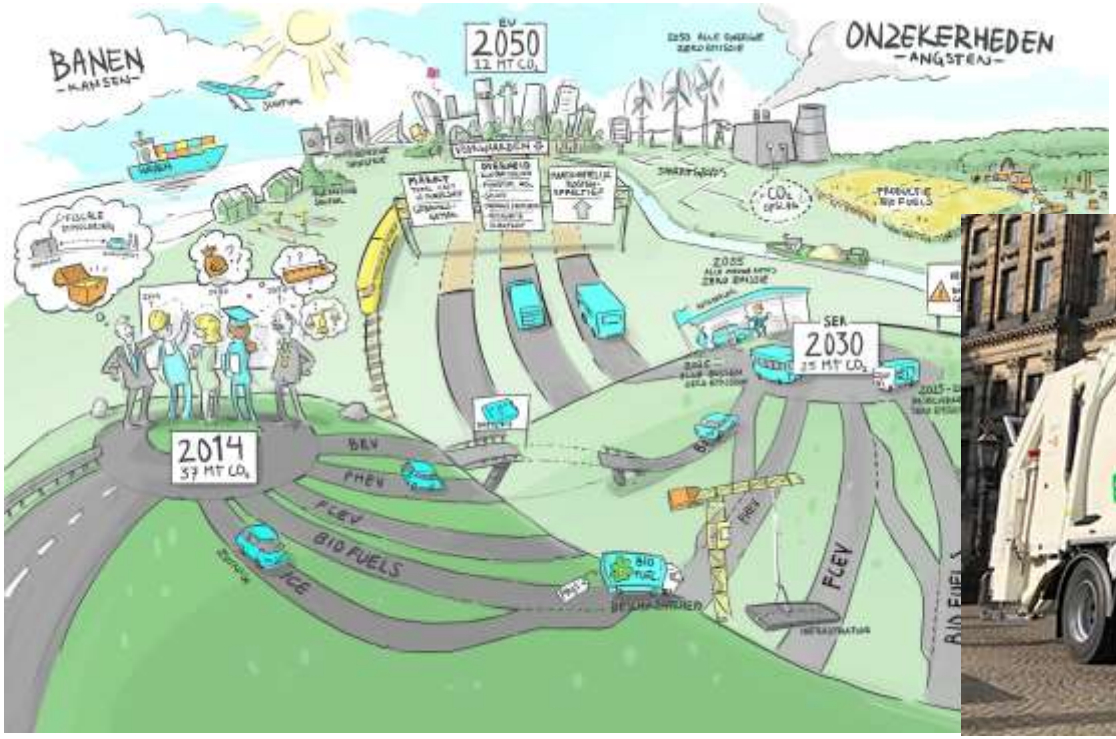

Highlight: 40 Zero Emission Zones by 2025

How NL works together in Public-Private Partnerships
荷兰是如何在公私合作部门开展工作的

- Involve all stakeholders …
- 所有的利益相关方都参与

- … to forge Green Deals
- 打造绿色项目

Transport Decarbonization Alliance

- Uniting countries, cities and companies (3C's)
  交通脱碳 联盟（TDA): 联合国家、城市和公司

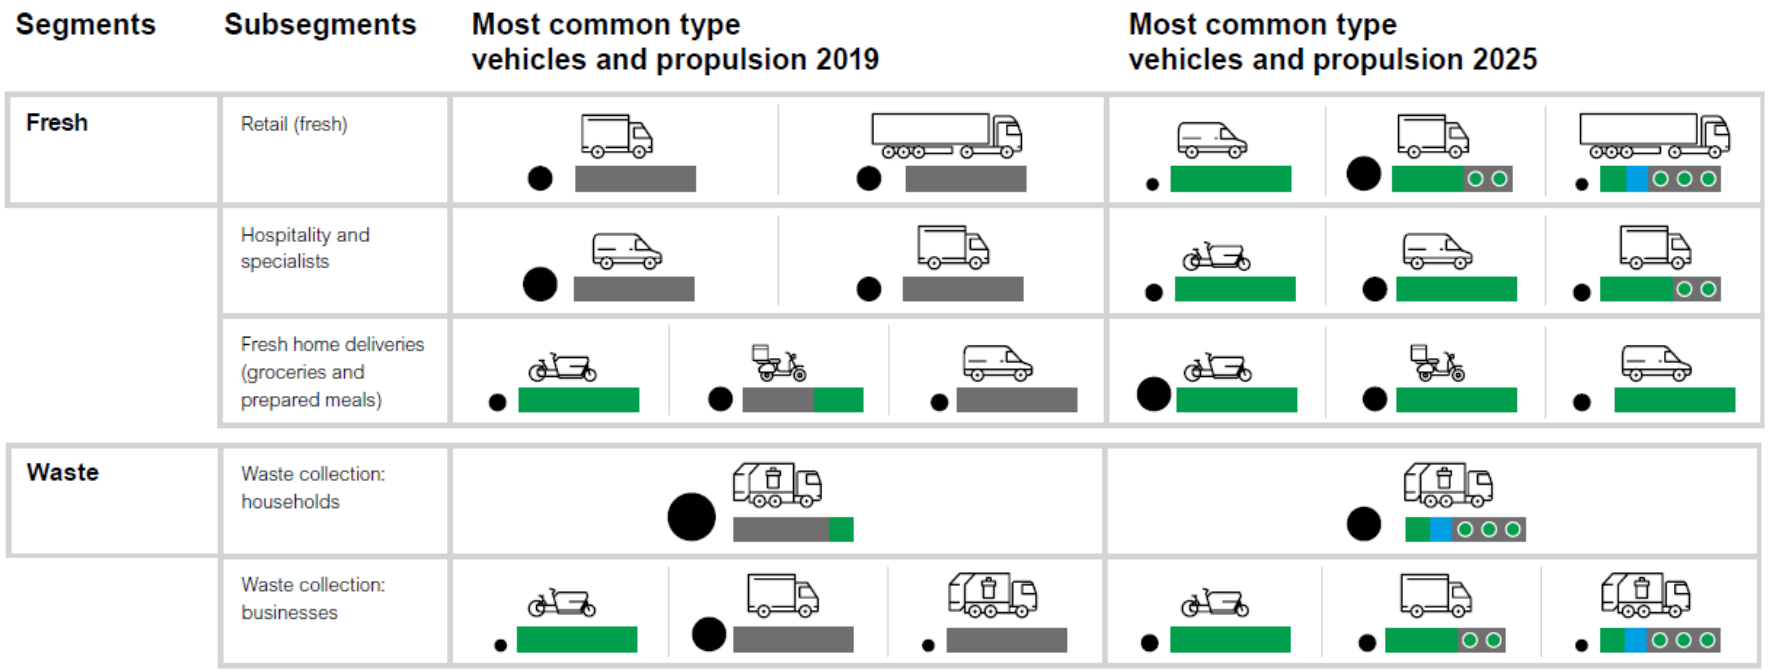

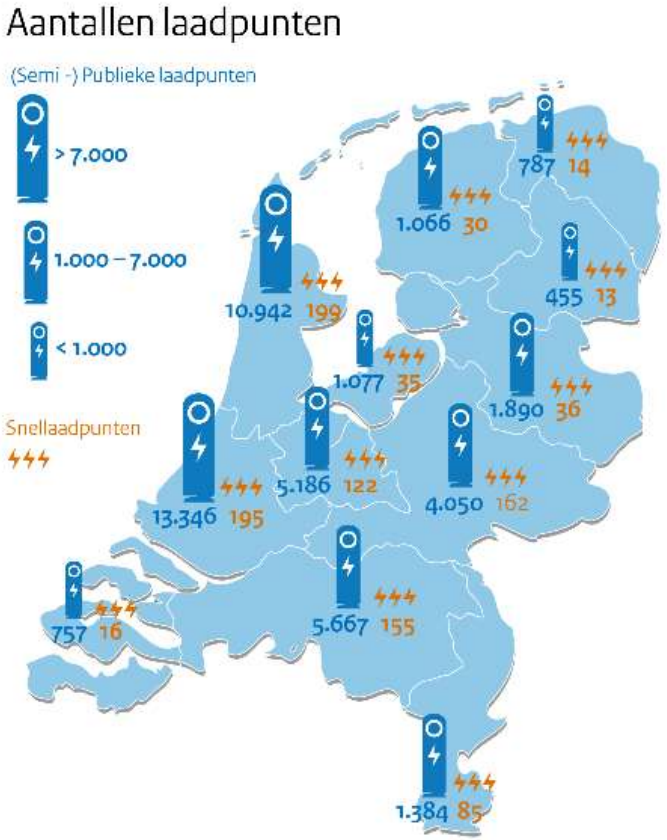

Example: Rotterdam ZE City Logistics Roadmap

Expected transition to zero emission city logistics by 2025
Rotterdam city centre

Proactively roll-out charging infrastructure

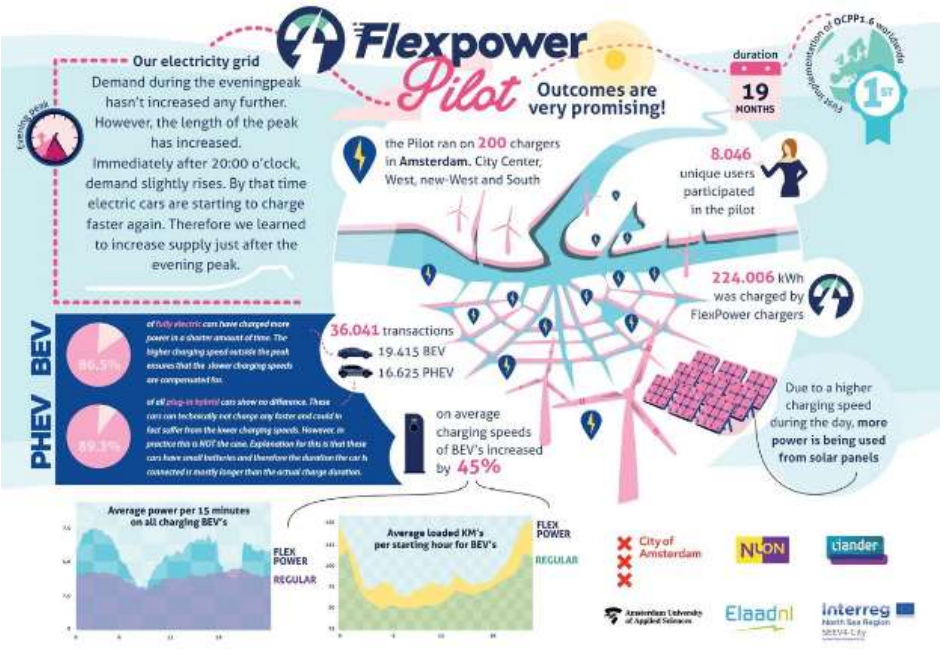

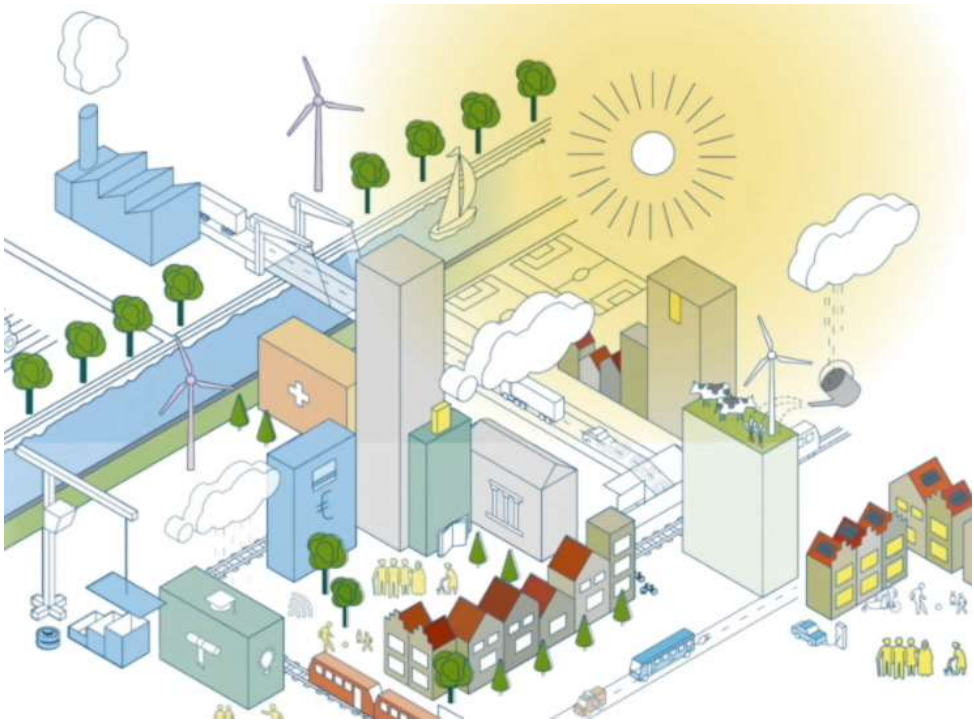

Systems integration of mobility and energy sector

- Developing Smart Charging
- 正在开发智能充电

- City Deal “shared e-mobility”
- 城市项目“共享 e-交通”

Netherlands *on the move*

荷兰正在行动

THANK YOU!

谢谢
