Policy Pathways – the nuts and bolts of energy efficiency policy implementation

Vida Rozite

Energy Efficiency Unit IEA

September 2011

Policy Pathways series

- **Aim** is to assist governments to implement energy efficiency policy effectively
- **Objective** is to identify, analyse and communicate to all governments innovative policy pathways (steps and milestones) for implementing energy efficiency

Policy Pathway

Policy Pathway series – schedule of work

- Appliances monitoring, verification and enforcement (Oct 2010)
- Buildings certification (November 2010)
- Public-private partnerships for energy efficiency finance (October 2011)
- Policies for fuel efficient vehicles (December 2011)
- **Industrial energy management (February 2012)**

Policy Pathway

Our aims and objectives

- **Aim:** To assist governments to promote effective energy management in industry
- **Objectives:**

- Identify, analyse and communicate lessons learned and best practices in policy to deliver energy management programmes;
- Highlight key issues to be considered;
- Indicate steps needed to plan, implement, monitor and evaluate programmes.

Policy Pathway

Approach

- Partnership with the Institute for Industrial Productivity
- Case studies of effective practices
- Involvement of international experts
- Expert review process – 7 October
- Workshop 30 September
- Delivery – February 2012

Policy Pathway

INSTITUTE FOR
Industrial Productivity
Sharing best practices for low carbon enterprises

Practical issues

- What to do in the case of emergency
- Facilities
- Documents (briefing papers and agenda)
- Release form
- Coffee breaks (11.30 & 15.30)
- Lunch (13.00)
- Internet - account username is 'WIFI' and the current password is 'welcome‘
- Time management
- Making interventions

Policy Pathway
