Constant VAN AERSCHOT is Vice-President at Lafarge's Sustainable Development & Public Affairs department; he specifically looks after Construction Standards & Regulations initiatives.

Constant currently works with leading organizations and networks that set standards for future sustainable buildings and cities; he is a regular speaker at international conferences.

Constant co-chaired WBCSD[i]'s "Energy Efficiency in Buildings" project and was a board member of the UNEP[ii] Sustainable Building and Climate Initiative.

He graduated as a civil engineer from the ETH in Zürich, and gained extensive building design experience while working for the global design firm ARUP in the UK, Germany and Australia.

Constant holds an MBA from the Cranfield School of Management (UK).
