

PARTICIPATION IN IEA TECHNOLOGY COLLABORATION PROGRAMMES (TCPs)

09 August 2017

Noteworthy developments since 1 January 2017

An active period for the TCPs, with creation of one new TCP and closing of two others. Governmental entities (Contracting Parties) from Austria, Canada, Chile, China, Italy and Sweden joined TCPs focusing end-use and renewable energy and hydrogen. Entities participating in their own right (Sponsors) joined TCPs focusing on fossil fuels and renewable energy and hydrogen. Details of participation are outlined

The **Clean Energy Education and Empowerment (C3E TCP)**, an initiative under the Clean Energy Ministerial (CEM), was announced as a new Technology Collaboration Programme during the 8th Clean Energy Ministerial in Beijing.

Natural Resources Canada became a Contracting Party to the **C3E TCP** on **1 June** 2017.

The **Swedish Ministry of the Environment and Energy** became a Contracting Party to the **C3E TCP** on **12 June** 2017.

The **Italian National Agency for New Technologies, Energy and Sustainable Economic Development (ENEA)** became a Contracting Party to the **C3E TCP** on **7 July** 2017

To reflect the evolving policy priorities of its members, the **TCP on Climate Technology Initiative (CTI TCP)** and the **TCP on Renewable Energy Technology Deployment (RETD TCP)** were closed as of June/July 2017.

The **National Centre for Innovation and Promotion of Sustainable Energy (CIFES)** became a Contracting Party to the **TCP on Photovoltaic Power Systems (PVPS TCP)** on **4 May** 2017.

The **Society of Engineers of China (SEA-China)** became a Contracting Party to the **TCP on Advanced Fuel Cells (AFC TCP)** on **5 April** 2017.

The **National Centre for Innovation and Promotion of Sustainable Energy (CIFES)** became a Contracting Party to the **TCP on Concentrating Solar Power (SolarPACES TCP)** on **30 March** 2017.

The **New Energy and Industrial Technology Development Organisation (NEDO) of Japan** became a Contracting Party to the **TCP on Wind Energy Systems (Wind TCP)** on **24 March** 2017.

The **National Traffic Safety and Environment Laboratory (NTSEL) of Japan** became a Contracting Party to the **TCP on Advanced Motor Fuels (AMF TCP)** on **26 January** 2017.

The **Republic of Austria** became a Contracting Party to the **TCP on District Heating and Cooling (DHC TCP)** on **1 January** 2017

GE Oil & Gas Engineering of the United States became a Sponsor to the **TCP on Gas and Oil (GOTCP)** on **3 April** 2017.

Southern Company Services, Inc. of the United States became a Sponsor to the **TCP on Greenhouse Gas R&D (GHG TCP)** on **1 August** 2017

**There are two possible categories of participation in a TCP, as a Contracting Party, or CP (an entity designated by the government of an OECD member or non-member country) or as a Sponsor, or SP (an entity of an OECD member or non-member country that is not designated by the government of their respective country).*

PARTICIPATION IN TECHNOLOGY COLLABORATION PROGRAMMES (TCPs)

09 August 2017

Participation by category

Participation by TCP grouping

TCPs in which each countries and intergovernmental organisations participate

Intergovernmental represents the European Commission (EC), the Economic Community of West African States (ECOWAS), ITER, and the Organisation for Petroleum Exporting Countries (OPEC).

Notes

Participation represents the number of entities participating in each TCP. An entity may participate in more than one TCP.

There are two possible categories of participation in a TCP, as a Contracting Party, or CP (an entity designated by the government of an OECD member or non-member country) or as a Sponsor, or SP (an entity of an OECD member or non-member country that is not designated by the government of their respective country).

Participation of intergovernmental organisations are reported under the category 'Intergovernmental' rather than the country in which the organisation is located.

Intergovernmental represents the European Commission (EC), the Economic Community of West African States (ECOWAS), ITER, and the Organisation for Petroleum Exporting Countries (OPEC).

Participation represents the number of entities participating in each TCP. An entity may participate in more than one TCP.

*Participation of intergovernmental organisations located in this country is reported under the name of the organisation in the section IGOs.

Estonia and Luxembourg do not as yet participate in any TCPs.

Intergovernmental represents the European Commission (EC), the Economic Community of West African States (ECOWAS), ITER, and the Organisation for Petroleum Exporting Countries (OPEC).

There are two possible categories of participation in a TCP, as a Contracting Party, or CP (an entity designated by the government of an OECD member or non-member country) or as a Sponsor, or SP (an entity of an OECD member or non-member country that is not designated by the government of their respective country).

Notes

An entity may participate in more than one TCP.

There are two possible categories of participation in a TCP, as a Contracting Party, or CP (an entity designated by the government of an OECD member or non-member country) or as a Sponsor, or SP (an entity of an OECD member or non-member country that is not designated by the government of their respective country).

IGO represents intergovernmental organisations: the European Commission (EC), the Economic Community of West African States (ECOWAS), ITER, and the Organisation for Petroleum Exporting Countries (OPEC).
