

Oil Market Report

INTERNATIONAL ENERGY AGENCY

ANNUAL STATISTICAL SUPPLEMENT

with 2008 data

2009 Edition

This Statistical Supplement has been prepared to provide a longer historical perspective for the oil demand, supply, trade, stocks, prices and refining data than is normally included in the *Oil Market Report (OMR)*. Readers requiring further details on individual countries are referred to the following IEA publications, for OECD countries: *Oil Information*, and for Non-OECD countries: *Energy Statistics of Non-OECD Countries* and *Energy Balances of Non-OECD Countries*. Quarterly data are available in *Oil, Gas, Coal and Electricity Quarterly Statistics* and *Energy Prices and Taxes*. Data in this supplement reflect the most current available information at the point of publication for years up to and including 2008. However, since data revisions are received every month, data published in future *OMRs*, and in the *Monthly Oil Data Service (MODS)*, will differ.

With effect from the 2007 Edition, the *Annual Statistical Supplement and User's Guide* took on a different format, the statistical supplement being produced in PDF format while the *Glossary and User's Guide* became a separate web-based publication available at our web site www.oilmarketreport.org. Fully interactive, the online Glossary and User Guide allows the reader to search, sort and print detailed information on data sources, definitions, technical terms and the underlying methodology used in preparing the *OMR* and *Medium-Term Oil Market Report (MTOMR)*.

www.oilmarketreport.org

The IEA Monthly Oil Data Service

A Unique Source of Official Statistical Data and the Most Comprehensive and Up-to-Date Information Available on the Global Oil Market

The IEA *Monthly Oil Data Service (MODS)* provides a detailed database of historical and projected information used in preparing the IEA *Oil Market Report (OMR)*. This service comprises **three packages**, available separately or combined, on a subscription basis via the Internet (<http://modsinfo.iea.org>). The MODS service is updated with the most recently available data on the day of official release of the *OMR*.

A dynamic software package is included allowing user-friendly access and manipulation of the data tables. Alternatively, data text files are made available to facilitate the direct importing of tables into other database software. Unless otherwise stated, each package includes historical data back to January 1984. Packages include:

1. Supply, Demand, Balances and Stocks:

- **Supply:** monthly, quarterly and annual supply for crude, NGL and non-conventional oils in individual OECD and Non-OECD countries with aggregates shown for the OECD and non-OECD regions. Data are reported in thousand barrels per day and include six to 18 months of forecasts.
- **Demand:** monthly, quarterly and annual demand data for 10 products in individual OECD countries and aggregated by OECD region; total quarterly and annual demand for Non-OECD countries. The non-OECD dataset starts in 1991. Both datasets are reported in thousand barrels per day and include six to 18 months of forecasts.
- **Balances:** monthly supply and demand balances for individual OECD countries, presenting indigenous production, imports, exports, stock changes, refinery intake and output, international marine bunkers and deliveries for inland consumption for 20 products. Data are reported in thousand metric tonnes.
- **Stocks:** comprehensive monthly coverage of industry and government-controlled stock data in individual OECD countries and for the three OECD regions, covering crude oil, NGL and feedstocks, motor gasoline, middle distillates residual fuel oil and other products. Data are reported in thousand barrels. Historical monthly data back to January 1988, with data from 1984 to 1987 available on a quarterly basis.

2. **Trade:** Monthly information on OECD Member countries' imports from over 90 origins and exports to over 80 destinations for 21 products. Included are: crude oil, NGL, motor gasoline, gas/diesel oil, residual fuel oil and 16 other products. Data are reported in thousand metric tonnes.

3. **Field-by-Field Supply:** Monthly, quarterly and annual production, starting in 1994 and including the forecast period covered in the *OMR* (six to 18 months) and forecasts for over 1000 fields, streams or aggregates in over 95 OECD and Non-OECD countries. Data are reported in thousand barrels per day.

A 'demo' service is available for clients interested in purchasing the MODS; if you would like access to this or require further information, please send an e-mail to: stats@iea.org. Order online at <http://modsinfo.iea.org>.

1 Historical demand figures may not correspond to previous publications due to revisions in base levels and conversion factors of oil products.

2 Measured as deliveries from refineries and primary stocks. Comprises inland deliveries, international marine bunkers and refinery fuel. It includes crude for direct burning, oil from non-conventional sources and other sources of supply.

3 Total Non-OPEC excludes all countries that were members of OPEC at 1 January 2009. Total OPEC comprises all countries which were OPEC members at 1 January 2009.

Other Asia includes Indonesia throughout. Latin America excludes Ecuador throughout. Africa excludes Angola and includes Gabon throughout.

4 Net volumetric gains and losses in refining process (excluding net gain/loss in China and non-OECD Europe) and marine transportation losses.

5 Other Biofuels are from sources outside Brazil and US. North and Latin America oil supply totals include US and Brazilian ethanol.

6 Venezuelan Orinoco heavy crude production is included within Venezuelan crude estimates. Orimulsion fuel remains within the OPEC NGL & non-conventional category, but Orimulsion production reportedly ceased from January 2007.

7 Comprises crude oil, condensates, NGLs, oil from non-conventional sources and other sources of supply.

8 Includes changes in non-reported stocks in OECD and non-OECD areas.

1 Historical demand figures may not correspond to previous publications due to revisions in base levels and conversion factors of oil products.

2 Measured as deliveries from refineries and primary stocks. Comprises inland deliveries, international marine bunkers and refinery fuel. It includes crude for direct burning, oil from non-conventional sources and other sources of supply.

3 Total Non-OPEC excludes all countries that were members of OPEC at 1 January 2009. Total OPEC comprises all countries which were OPEC members at 1 January 2009. Other Asia includes Indonesia throughout. Latin America excludes Ecuador throughout. Africa excludes Angola and includes Gabon throughout.

4 Net volumetric gains and losses in refining process (excluding net gain/loss in China and non-OECD Europe) and marine transportation losses.

5 Other Biofuels are from sources outside Brazil and US. North and Latin America oil supply totals include US and Brazilian ethanol.

6 Venezuelan Orinoco heavy crude production is included within Venezuelan crude estimates. Orimulsion fuel remains within the OPEC NGL & non-conventional category, but Orimulsion production reportedly ceased from January 2007.

7 Comprises crude oil, condensates, NGLs, oil from non-conventional sources and other sources of supply.

8 Includes changes in non-reported stocks in OECD and non-OECD areas.

1 Historical demand figures may not correspond to previous publications due to revisions in base levels and conversion factors of oil products.

2 Measured as deliveries from refineries and primary stocks. Comprises inland deliveries, international marine bunkers and refinery fuel. It includes crude for direct burning, oil from non-conventional sources and other sources of supply.

3 Total Non-OPEC excludes all countries that were members of OPEC at 1 January 2009. Total OPEC comprises all countries which were OPEC members at 1 January 2009. Other Asia includes Indonesia throughout. Latin America excludes Ecuador throughout. Africa excludes Angola and includes Gabon throughout.

4 Net volumetric gains and losses in refining process (excluding net gain/loss in China and non-OECD Europe) and marine transportation losses.

5 Other Biofuels are from sources outside Brazil and US. North and Latin America oil supply totals include US and Brazilian ethanol.

6 Venezuelan Orinoco heavy crude production is included within Venezuelan crude estimates. Orimulsion fuel remains within the OPEC NGL & non-conventional category, but Orimulsion production reportedly ceased from January 2007.

7 Comprises crude oil, condensates, NGLs, oil from non-conventional sources and other sources of supply.

8 Includes changes in non-reported stocks in OECD and non-OECD areas.

¹ Comprises deliveries from refineries/primary stocks plus international marine bunkers, refinery fuel and crude for direct burning, oil from non-conventional sources and other sources of supply; historical demand figures may not always correspond to previous publications due to revisions in base levels and in the conversion factors of oil products.

² US figures exclude US territories.

¹ Includes net deliveries of oil products from refineries and primary storage, plus refinery fuel use, international marine bunkers, crude for direct burning and non-conventional oils.
Source: *Energy Statistics of Non-OECD Countries (2009 Edition)*. Figures in the table are constructed on a different basis from that employed in the rest of this Supplement.
Includes also biofuels demand.

² FSU demand is an estimate of actual demand.

³ China demand is an estimate of actual demand.

¹ Includes net deliveries of oil products from refineries and primary storage, plus refinery fuel use, international marine bunkers, crude for direct burning and non-conventional oils.

Source: Energy Statistics of Non-OECD Countries (2009 Edition). Figures in the table are constructed on a different basis from that employed in the rest of this Supplement.

Includes also biofuels demand.

² FSU demand is an estimate of actual demand.

³ China demand is an estimate of actual demand.

¹ Total Non-OPEC excludes all countries that were members of OPEC at 1 January 2009. Total OPEC comprises all countries which were OPEC members at 1 January 2009.

Other Asia includes Indonesia throughout. Latin America excludes Ecuador throughout. Africa excludes Angola and includes Gabon throughout.

² Includes condensates reported by OPEC countries, oil from non-conventional sources, e.g. Venezuelan Orimulsion (but not Orinoco extra-heavy oil), and non-oil inputs to Saudi Arabian MTBE. Orimulsion production reportedly ceased from January 2007.

³ Comprises crude oil, condensates, NGLs and oil from non-conventional sources.

⁴ Includes small amounts of production from Israel, Jordan and Bahrain.

⁵ Net volumetric gains and losses in refining (excludes net gain/loss in China and non-OECD Europe) and marine transportation losses.

⁶ Other Biofuels are from sources outside Brazil and US. US and Brazil oil supply include ethanol.

¹ Stocks are primary national territory stocks on land (excluding utility stocks and including pipeline and entropot stocks where known) and include stocks held by industry to meet IEA, EU and national emergency reserve commitments and are subject to government control in emergencies.

² Total products includes gasoline, middle distillates, fuel oil and other products.

³ Total includes NGLs, refinery feedstocks, additives/oxygenates and other hydrocarbons.

¹ Stocks are on-land primary stocks. They include stocks held by industry to meet IEA, EU and national emergency commitments and are subject to government control in emergencies. From 1 January 1991 onwards (unlike earlier years) they are on a national territory rather than an ownership basis; they exclude power station stocks and include pipeline and entrepot stocks, where known. Stocks at end of 1990 are shown on both bases.

² Note that days of forward demand represent the stock level divided by the forward quarter average daily demand for petroleum products.

³ Stock holding organisations established in some European countries to hold mandatory stocks.

1 Stocks are on-land primary stocks. They include stocks held by industry to meet IEA, EU and national emergency commitments and are subject to government control in emergencies. From 1 January 1991 onwards (unlike earlier years) they are on a national territory rather than an ownership basis; they exclude power station stocks and include pipeline and entrepot stocks, where known. Stocks at end of 1990 are shown on both bases.

2 Note that days of forward demand for petroleum products represent the stock level divided by the forward quarter average daily demand. Days of Crude oil stocks are based on refinery throughputs for the next month.

3 "Other Products" category includes other refined petroleum products. This category does not include NGLs, refinery feedstocks, additives/oxygenates and other hydrocarbons.

¹ Source: Purvin & Gertz / IEA.

For the purposes of this Report, refining margins are calculated for various complexity configurations, each optimised for processing the specific crude in a specific refining centre on a 'full cost' basis. Consequently, reported margins should be taken as an indication, or proxy, of changes in profitability for a given refining centre. No attempt is made to model or otherwise comment upon the relative economics of specific refineries running individual crude slates and producing custom product sales, nor are these calculations intended to infer the marginal values of crudes for pricing purposes.

² The China refinery margin calculation represents a model based on spot product import/export parity, and does not reflect internal pricing regulations.

¹ Nominal exchange rates based on *OECD Main Economic Indicators*.

² Unleaded premium (95 RON) for France, Germany, Italy, Spain, UK; regular unleaded for Canada, Japan and USA.

³ For Canada, VAT excluded from prices for automotive diesel when refunded to industry.

⁴ Kerosene for Japan.

⁵ VAT excluded from prices for fuel oil when refunded to industry.

For Canada and USA, prices refer to the average of LSFO and HSFO. For Germany, France, Italy, Japan and Spain prices refer to LSFO. For UK, prior to 2003 prices refer to HSFO, from 2003 to 2007, prices are for LSFO.

¹ Based on Monthly Oil Questionnaire data submitted by OECD countries in tonnes, and converted to barrels at 7.37 barrels per tonne. Data will differ from that in the "Oil Information 2009" and also from that in Table 22 of this Supplement, the latter based on submissions in barrels.

² West Africa includes Angola, Nigeria, Gabon, Congo and Democratic Republic of Congo.

¹ Data based on monthly submissions from IEA countries to the crude oil import register (in '000 bbl), subject to availability. Data may differ from Table 21 of this Supplement.

IEA Europe weighted average includes the Czech Republic from 2001 onwards, and the Slovak Republic from 2007 onwards. Hungary is not included.

IEA Pacific weighted average includes Korea from 2001 onwards.

² Iraqi Total minus Kirkuk.

³ Iranian Total minus Iranian Light.

⁴ 33 API and lighter (e.g., Bonny Light, Escravos, Pennington, Qua Iboe and Oso Condensate).

1 Based on Monthly Oil Questionnaire data submitted by OECD countries in tonnes. Data differs from that published in the "Oil Information 2009". Gasoline is the sum of motor gasoline, aviation gasoline, jet gasoline and additives.

2 Total figure excludes intra-regional trade.

The International Energy Agency (IEA) makes every attempt to ensure, but does not guarantee, the accuracy and completeness of the information or the clarity of content of the the *Annual Statistical Supplement* (hereafter the *Supplement*). The IEA shall not be liable to any party for any inaccuracy, error or omission contained or provided in this *Supplement* or for any loss, or damage, whether or not due to reliance placed by that party on information in this *Supplement*.

The Executive Director and Secretariat of the IEA are responsible for the publication of the *Supplement*. Although some of the data are supplied by IEA Member-country governments, largely on the basis of information they in turn receive from oil companies, neither these governments nor these oil companies necessarily share the Secretariat's views or conclusions as expressed in the *Supplement*. The *Supplement* is prepared for general circulation and is distributed for general information only. Neither the information nor any opinion expressed in the *Supplement* constitutes an offer, or an invitation to make an offer, to buy or sell any securities or any options, futures or other derivatives related to such securities.

This *Supplement* is the copyright of the OECD/IEA and is subject to certain terms and conditions of use. These terms and conditions are available on the IEA website at <http://www.iea.org/oilmar/licenceomr.html>. In relation to the Subscription Edition (as defined in the *Supplement's* online terms and conditions), the spot crude and product price assessments are based on daily Platts prices, converted when appropriate to US\$ per barrel according to the Platts specification of products (© Platts – a division of McGraw-Hill Inc.). Any reproduction of information from the spot crude and product price tables requires the prior permission of Platts.
